Product Description:

One of the key features of this Android POS Terminal is its built-in 58mm Thermal Printer. This high-speed printer is capable of printing receipts and invoices quickly and efficiently. It uses thermal printing technology, which means it doesn't require ink or toner, making it more cost-effective in the long run.

Another great feature of this Handheld POS Machine is its NFC support. With NFC technology, you can accept payments from customers who use mobile payment systems like Apple Pay or Google Wallet. This makes the payment process faster and more convenient for your customers.

The Wifi Module of this Android POS Terminal is also impressive. It supports the 2.4G band and is compatible with 802.11a/b/g/n. This means you can connect to the internet wirelessly and use cloud-based POS systems. You can also use this feature to update your software and access online resources to improve your business operations.

In terms of network connectivity, this Handheld POS Terminal supports 2G, 3G, and 4G networks. This means you can use it almost anywhere, even in areas with poor or no Wi-Fi coverage. This feature makes it ideal for businesses that are always on the go, like food trucks or pop-up stores.

Finally, this Android Handheld POS Terminal comes with a scanner that supports 1D and 2D scans. This means you can quickly and accurately scan barcodes and QR codes for inventory management or product identification. This feature saves you time and reduces errors in your transactions.

Overall, our Android Handheld POS Terminal is a must-have for any business that wants to streamline its transactions and improve its customer experience. With its built-in 58mm Thermal Printer, NFC support, Wifi Module, network connectivity, and scanner, this Handheld POS Machine is a powerful tool that can help you grow your business.

Applications:

The Heimi H10 is an Android POS machine that is designed to cater to the needs of various business organizations. Its all-in-one POS PC design makes it an ideal choice for businesses looking for a compact and efficient POS terminal. The device comes with a rear 5.0M camera that can be used for scanning barcodes and QR codes, making it ideal for use in retail stores, supermarkets, and other businesses that require inventory management.

The 5.5-inch touch screen of the Heimi H10 provides a clear display, with a resolution of 1440*720, making it easy to read and navigate. Its compact design and built-in 58mm thermal printer make it ideal for use in restaurants, cafes, and other food businesses that require quick and efficient billing. The printer is capable of printing receipts with a high degree of accuracy and speed, making it an ideal choice for businesses that require frequent billing.

The Heimi H10 comes with an operating system of Android 13, which provides a high degree of flexibility and allows for customization of the device according to the specific needs of businesses. Its 16 GB flash provides ample storage space for applications and data, and it also has an option of 32GB. The device is ideal for use in various business scenarios, including retail, hospitality, and healthcare sectors. The Heimi H10's all-in-one POS terminal design makes it easy to set up and use, and it is an ideal choice for businesses looking for an efficient and reliable POS solution. Its compact design and high-performance features make it ideal for use in various business

environments, and its Android operating system ensures that it is compatible with a wide range of software applications. Overall, the Heimi H10 is an excellent choice for businesses looking for an all-in-one POS terminal that is both efficient and reliable.
