## Product Description

# 80mm High Speed printer

Receipt printing smooth , fast & clear

## Printer

Built-in 58mm thermal printer

Print speed: 80mm/s

Paper roll: 57mm Width×40mm Dia

### Product Description:

Powered by an 8-core 2.0GHz MTK6762 CPU, this POS terminal is designed to handle even the most demanding of retail and hospitality environments. Equipped with GMS services, you can be sure that this device is reliable, secure, and up-to-date, ensuring smooth and seamless operation.

Our POS terminal is designed to make transactions easier than ever before. With a printer that supports up to a maximum of 40mm paper, you won't have to worry about running out of paper mid-transaction. Plus, with a card slot that supports Nano Sim, Psam, and Micro SD cards, you'll have all the storage you need to keep track of all your transactions.

What's more, our POS terminal comes with an optional 2D built-in scanner, making it even easier to scan barcodes and keep track of inventory. Whether you need to scan a product, a customer's ID, or a loyalty card, our scanner makes it a breeze.

Whether you're running a small boutique or a large restaurant, our POS terminal is designed to meet your needs. With its compact and portable design, you can take it with you wherever you go, making it the perfect solution for businesses on the move.

So why wait? Order your Industrial Mobile Terminal, Retail POS Terminal, and Handheld POS Terminal today and take your business to the next level!

## Applications:

With its advanced Android 13 operating system and powerful 8-core,2.0GHz,MTK6762 CPU, the pos terminal can handle a variety of applications and software with ease. It also comes equipped with a 2.4G Band wifi module that supports 802.11a/b/g/n, as well as 2G, 3G, and 4G network connectivity options. This makes it an ideal choice for businesses that require flexibility and mobility. The 5.5" HD touch screen handheld pos is particularly well-suited for busy retail environments where speed and accuracy are essential. The main screen provides a clear and easy-to-use interface for processing transactions, while the secondary screen can be used to display promotional materials, advertising, or other relevant information.

One of the key benefits of the pos terminal is its versatility. It can be used in a variety of settings, including retail stores, restaurants, hotels, and other hospitality businesses. It is also an ideal choice for businesses that require cord end terminals, as it can be easily connected to other devices and hardware such as barcode scanners, printers, and cash drawers.

In summary, the Heimi H10 is a powerful and versatile POS terminal that is well-suited for a wide range of application occasions and scenarios. Its advanced features and flexible design make it an ideal choice for businesses that require fast and efficient payment processing, as well as cord end terminals. Whether you're running a large retail chain or a small boutique, our handheld pos can help you streamline your operations and improve your bottom line.
