### Product Description:

One of the key features of our POS terminal is its GSM support services, which ensures reliable and efficient network connectivity. Whether you are using 2G, 3G, or 4G network, you can expect seamless communication with our POS terminal.

Our POS terminal comes with a card slot that can accommodate 1 Nano Sim, 1 Psam, and 1 Micro SD card. This makes it possible to store and access data easily and securely.

Operating on Android 13, our POS terminal is equipped with the latest technology to provide an optimal user experience. This ensures that your business operations run smoothly and efficiently.

Our POS terminal also features a built-in 58mm thermal printer, which allows you to print receipts and other important documents on the

spot. This eliminates the need for investing in additional printing equipment, saving you time and money. With its advanced features and capabilities, our all-in-one credit card POS terminal is the perfect solution for any business looking to streamline their operations and improve their customer experience. Whether you are in retail, hospitality, catering or any other industry, our POS terminal will transform the way you do business.
