## Product Description

# 80mm High Speed printer

Receipt printing smooth , fast & clear

## Printer

Built-in 58mm thermal printer

Print speed: 80mm/s

Paper roll: 57mm Width×40mm Dia

### Product Description:

With its Android 13 operating system, this POS terminal provides a user-friendly interface that is easy to navigate. The 5.5-inch screen size is large enough to display all necessary information, while still being compact enough to be easily portable.

One of the standout features of this POS terminal is its NFC capabilities. This allows for quick and secure contactless payments, making transactions faster and more convenient for both the customer and the business. Additionally, the Android POS terminal NFC with thermal printer enables businesses to print receipts quickly and easily, providing customers with a convenient record of their transaction. With 16GB or 32GB of storage, this Android tablet POS terminal has plenty of space for all necessary applications and data. This ensures that businesses can run smoothly without worrying about running out of space.

In summary, our Android POS terminal with NFC is the perfect solution for businesses in the catering, retail, transportation, and lottery industries. Its versatility and compatibility with a range of scenarios make it a must-have for any business owner. With its Android 13 operating system, 5.5-inch screen size, and ample storage, this Android tablet POS terminal is both practical and efficient. Its NFC capabilities and thermal printer make it an even more valuable asset, providing customers with a fast and convenient payment experience.

## Applications:

The Android POS Terminal is a high-performance cash register point of sale device that can be used in a variety of scenarios. Its powerful octa-core 2.0 GHz processor and Android 13 operating system make it suitable for a wide range of applications. Below are some of the occasions and scenarios where this product can be used:

**Retail Stores:** The Android POS Terminal is an ideal solution for retail stores of all sizes. It can be used to manage inventory, process transactions, and generate reports. Its 2D scanner support for 1D and 2D codes scanning ensures that it can handle all types of merchandise. Plus, with its multiple language support, it can be used by employees who speak different languages.

**Restaurants:** The pos device is also a great choice for restaurants. It can be used to take orders, process payments, and manage inventory. Its 35-hour battery life ensures that it can be used throughout the day without needing to be charged. Plus, with its support for multiple languages, it can be used by employees who speak different languages.

**Hotels:** The Android POS Terminal is also a great choice for hotels. It can be used to manage reservations, process payments, and generate reports. Its 2D scanner support for 1D and 2D codes scanning ensures that it can handle all types of guest requests. Plus, with its multiple language support, it can be used by hotel staff who speak different languages.

**Supermarkets:** The Android POS Terminal is an ideal solution for supermarkets of all sizes. It can be used to manage inventory, process transactions, and generate reports. Its 2D scanner support for 1D and 2D codes scanning ensures that it can handle all types of merchandise. Plus, with its multiple language support, it can be used by employees who speak different languages.

The Android POS Terminal is also available as an OEM Android POS Terminal. This makes it an ideal choice for companies that want to brand their own Android handheld POS terminal. With its certification for CE, FCC, and RoHS, companies can be assured that they are getting a high-quality product. The minimum order quantity is 1, and the price is negotiable. The packaging details are 1 piece in one box, with 10 pieces in one carton. Delivery time for samples is 3-7 working days, with bulk orders to be discussed. Payment terms are T/T and L/C, and the supply ability is 20,000 pcs/month.

## Customization:

This top-of-the-line android pos terminal boasts a powerful octa-core processor that delivers lightning-fast performance, along with 2GB or 3GB of RAM and up to 32GB of internal storage. It also features a 5MP rear camera, 2D scanner that supports 1D and 2D codes scanning, and a variety of different apps in the app store for you to choose from. Plus, with NFC technology built in, you can make transactions quickly and easily.

The Heimi H10 is made in China and comes with CE, FCC, and RoHS certifications, ensuring that it meets the highest standards of quality and safety. It also has a minimum order quantity of 1 and a supply ability of up to 20,000 units per month, making it a great choice for businesses of all sizes.

When you order the Heimi H10, you can choose from a range of customization services to make it your own. We offer different packaging options, including 1 piece in one box or 10 pieces in one carton, and we can discuss delivery times for bulk orders. We accept T/T and L/C payment terms, and our prices are always negotiable.

So why wait? Order your android handheld pos terminal with printer today and experience the power and flexibility of the Heimi H10!
