Product Description:

One of the most notable features of this Android POS Terminal is its operating system. It uses Android 13, the latest version of the popular mobile operating system. This ensures that the terminal is fast, responsive, and up-to-date with the latest security features. The Android POS Terminal with Printer is perfect for a wide range of scenarios. It can be used for queueing, making it ideal for businesses that experience a high volume of traffic. It is also great for mobile payment, allowing customers to pay quickly and easily using their smartphones. Additionally, it is perfect for take-away delivery, allowing businesses to easily process orders and print receipts. Another great feature of this Android POS Terminal is its battery life. With a battery life of 35 hours, it can easily last for an entire day of use without needing to be recharged. This makes it perfect for businesses that require a mobile POS solution. The Android POS Terminal with Printer also comes equipped with a 5MP rear camera. This camera is perfect for businesses that need to scan barcodes or take pictures of products for inventory management. It is also great for businesses that require visual documentation of transactions.

Applications:

The handheld pos is a high-quality Android POS terminal with a SIM card that is manufactured in China. It is certified with CE, FCC, and RoHS certifications, making it safe and reliable for use in a variety of settings.

The pos machine is designed for use in a variety of applications, including retail, hospitality, and entertainment. It is ideal for use in POS systems, self-service kiosks, and other applications where a reliable, versatile, and efficient POS system is required.

The H10 features an octa-core, 2.0 GHz processor, 2GB RAM +16GB ROM or 3GB RAM + 32 GB ROM of memory, and a 2D scanner that supports 1D and 2D code scanning. It also comes equipped with NFC technology for added convenience and security.

The H10 is a touch screen pos terminal manufactured that provides a seamless user experience, making it easy to navigate and use. It is designed with a TMS (Terminal Management System) that helps manage and monitor the device remotely, ensuring that it is always up-to-date and functioning properly.

With a minimum order quantity of one sample and a negotiable price, the pos is an affordable and reliable POS solution for businesses of all sizes. It is packaged with 1 piece in one box and 10 pieces in one carton, making it easy to transport and store.

Delivery times for samples are typically 3-7 working days, while bulk orders can be discussed. Payment terms include T/T and L/C, and the H10 has a supply ability of up to 20,000 pcs per month.
