Product Description

Product Description:

In addition, the Android POS Terminal comes with different APPS in the app store for clients to choose from, making it easy for businesses to customize the system to their specific needs. The system also boasts 16GB/32GB of storage, ensuring that businesses can store all the data they need without running out of space.

One of the key features of the Android POS Terminal is its 2D scanner, which supports both 1D and 2D codes scanning. This allows businesses to quickly and accurately scan barcodes, making it easy to keep track of inventory and sales. Finally, the Android POS Terminal runs on Android 13, providing businesses with a powerful and user-friendly operating system. Whether you are using the system as an Android POS lottery terminal or an Android POS terminal touch screen manufacturer, you can be sure that it will deliver reliable and efficient performance.

Applications:

The H10 model is a handheld Android POS terminal that is perfect for use in small and medium-sized businesses. It is a powerful device that can handle a variety of tasks, including payment processing, inventory management, and customer relationship management. The device is equipped with a battery that has a capacity of 7.7V/3000mAh, which is equal to 3.85V16000mAh, allowing it to operate for up to 35 hours on a single charge.

The Heimi H10 Android POS terminal is ideal for use in the retail industry, including convenience stores, supermarkets, and retail shops. The device comes with Wi-Fi, Bluetooth, and 4G connectivity, making it easy to connect to a range of devices and networks. The device also has 2GB RAM +16GB ROM or 3GB RAM + 32 GB ROM, making it efficient for running various applications. The device comes with a TMS (terminal management system) that allows for easy management of multiple devices from a central location.

Another application of the Heimi H10 Android POS terminal is in the hospitality industry, including restaurants, cafes, and bars. The device can be used to process payments, manage orders, and track inventory. The device's connectivity features also make it easy to connect to a range of peripherals, including barcode scanners and receipt printers.

The Heimi H10 Android POS terminal can also be used in the transportation industry, including taxi and ride-hailing services. The device can be used to process payments, manage bookings, and track driver performance. The device's connectivity features also make it easy to connect to GPS and mapping systems.

In summary, the Heimi H10 Android POS terminal is a versatile and powerful device that can be used in a range of applications and industries. It is a handheld Android POS terminal that is perfect for use in small and medium-sized businesses. The device is equipped with a battery that has a long life, making it ideal for use in a variety of scenarios. With its advanced features and functionalities, the Heimi H10 Android POS terminal is a cost-effective solution for businesses looking to streamline their operations and improve their bottom line.
