Product Description:

The device comes equipped with multiple connectivity options such as WiFi, Bluetooth, and 4G LTE, making it easy to connect to the internet and process transactions in real-time. Its multi-point touch capacitive screen allows for quick and easy navigation, while its 1GB / 2GB / 3GB RAM ensures smooth and efficient performance. Our Mobile POS product also supports various payment methods, including NFC card, mobile wallet, and QR code payment. This ensures that your business can accept payments from a wide range of customers. In terms of interface, the device supports type-C, OTG, and a 3.5mm earphone jack. This provides seamless connectivity and allows for various peripherals to be connected to the device. Overall, our Mobile POS product is a versatile and reliable device that can function as a handheld POS with printer, portable lottery machine, or POS portable machine for businesses on-the-go. Its multiple connectivity options, capacitive touch screen, RAM options, and payment method support make it an ideal choice for businesses looking to process transactions quickly and efficiently.

Applications:

The Sunmi V2S is a mobile POS terminal that is designed to provide fast and efficient payment processing to various businesses. Here are some of the product application occasions and scenarios for the Sunmi V2S:

Retail Stores: The Sunmi V2S is perfect for retail stores that need a portable POS terminal to complete transactions quickly and efficiently. Its compact design allows for easy portability, and its multi-point touch capacitive screen ensures accurate inputs. The NFC feature allows for easy contactless payments.

Restaurants: The Sunmi V2S is an ideal mobile POS terminal for restaurants that need to take orders and process payments tableside. Its 4G LTE connectivity ensures that transactions can be processed quickly, and the NFC feature makes it easy to accept contactless payments.

Outdoor Events: The Sunmi V2S is also a great choice for outdoor events such as fairs, festivals, and concerts. Its GPS and AGPS capabilities make it easy to locate and track sales, and its removable lithium polymer battery ensures that it can be used for extended periods of time without needing to be charged.

Delivery Services: The Sunmi V2S is perfect for delivery services that need a mobile POS terminal to accept payments on the go. Its 4G LTE connectivity ensures that transactions can be processed quickly, and the NFC feature makes it easy to accept contactless payments. The Sunmi V2S is a certified product, having passed CE, FCC, RoHS, MSDS, and BIS certifications. The minimum order quantity for the Sunmi V2S is 1, and the price is to be negotiated. The packaging details include 1pc/box and 10pcs/carton. The delivery time is 4-7 working days, and payment terms are T/T. The supply ability is 20000 pieces per month. The Sunmi V2S also comes with a T5940 and T5941 model approval.

In conclusion, the Sunmi V2S is an excellent mobile POS terminal with NFC that can be used in various settings such as retail stores, restaurants, outdoor events, and delivery services. Its many features such as GPS, 4G LTE connectivity, and a removable lithium polymer battery make it a versatile and reliable choice for any business that needs a portable POS terminal.
