## Product Description

V2s can help support your venue ticket checking. Paper or mobile tickets, 2D or QR code, can be checked by the V2s, equipped with a professional scan engine. Its strong stable body can be held with one hand, allowing you to still bring fun to the children.

## Product Description:

With a removable Lithium Polymer Battery of 7.7V/3500mAh (equal to 3.85V/7000mAh), our Mobile Handheld Terminal Android POS offers a long-lasting battery life that can keep up with your business operations without needing frequent charging. This feature makes it ideal for businesses that require a portable device that can be used for extended periods of time.

When it comes to connectivity, our hand held pos offers a variety of options to ensure that you can stay connected to your customers and business at all times. You can easily connect to WiFi, Bluetooth, and 4G LTE, making it convenient to process transactions wherever you are.

The fast print speed of our Mobile Handheld Terminal Android POS is another standout feature. With a print speed of 80mm/s, you can quickly print receipts and other important documentation for your customers, making their experience with your business smooth and efficient.

Our Mobile Handheld Terminal Android POS comes in three different RAM options - 1GB, 2GB, and 3GB - allowing you to choose the option that best suits your business needs. With this feature, you can be sure that your device will run smoothly and efficiently even when processing numerous transactions at once.

In conclusion, our Mobile Handheld Terminal Android POS is the perfect solution for businesses that require a portable device that is efficient, reliable, and easy to use. With its seamless user experience, long-lasting battery life, various connectivity options, fast print speed, and multiple RAM options, it's a device that can help take your business to the next level.

## Applications:

The V2S POS terminal features a multi-point touch capacitive screen that provides a seamless user experience. The device is equipped with a 5.0MP rear camera, and an 8.0MP camera is also available as an option. This feature allows businesses to easily scan barcodes, QR codes, and other important documents. Additionally, the 58mm thermal printer supports receipt and label print, making it easier for businesses to print important documents on the go.

The Sunmi V2S runs on the SUNMI OS, which is based on Android 11. This operating system provides users with a familiar and easy-to-use interface that is customizable and scalable. The device also supports multiple languages, including English, Spanish, French, Chinese, and more. This feature is essential for businesses that operate in different regions.

The V2S POS terminal is perfect for businesses that require mobility and flexibility. It can be used in various scenarios, such as retail stores, restaurants, cafes, warehouses, and more. The device can also be used for mobile sales, enabling businesses to sell their products and services on the go. The V2S POS terminal is a reliable and efficient solution for businesses that require a mobile lottery POS terminal, mobile handheld POS, or portable POS with a printer.
