Product Description:

One of the key features of the Mobile POS Product is its SIM and MicroSD slot. This allows you to easily connect to the internet using a nano SIM card. Additionally, you can expand the storage capacity of the device with a MicroSD card, making it easy to store important data and files.

The Mobile POS Product also features a multi-point touch capacitive screen. This makes it easy to navigate the device and input data quickly and accurately. The screen is also highly responsive, ensuring that you can easily access all of the features and functions of the device.

Another key feature of the Mobile POS Product is its GPS functionality. This allows you to easily track your location and navigate to different destinations. Additionally, the device features AGPS, which helps to improve location accuracy, making it ideal for use in outdoor settings.

The Mobile POS Product is also highly versatile when it comes to connectivity. It comes equipped with WiFi and Bluetooth connectivity, allowing you to easily connect to other devices and networks. Additionally, it features 4G LTE connectivity, which allows you to access the internet at high speeds, even when you're on the go. Finally, the Mobile POS Product is powered by SUNMI OS, which is based on Android 11. This operating system is highly optimized for use on mobile devices and provides a sleek and intuitive user interface. It also comes with a range of advanced features and functions, making it easy to customize the device to meet your specific needs.

Applications:

The Sunmi V2S is a handheld, portable POS terminal that is designed to meet the needs of a variety of businesses. With its sleek design and powerful features, the Sunmi V2S is a versatile tool that can be used in a number of different scenarios.

Whether you run a coffee shop, a convenient store, a lottery store, a warehouse, or a bakery shop, the Sunmi V2S is the perfect device for your business. It is easy to use and comes with a range of connectivity options, including WiFi, Bluetooth, and 4G LTE.

The Sunmi V2S is also available in a scanner version, which comes with a built-in 2D scanner. This makes it even more versatile and allows you to easily scan barcodes and QR codes. This feature is particularly useful for businesses that need to track inventory or manage customer loyalty programs.

The Sunmi V2S is also certified by CE, FCC, RoHS, MSDS, and BIS, ensuring that it meets the highest standards for quality and safety. It is powered by a removable, lithium polymer battery that provides up to 7.7V/3500mAh (equal to 3.85V/7000mAh) of power, giving you plenty of battery life to get through the day.

In terms of language support, the Sunmi V2S supports a wide range of languages, including English, Spanish, French, and Chinese, making it a great choice for businesses that operate in multiple countries or regions.

The Sunmi V2S is available for purchase with a minimum order quantity of 1 and a price that can be negotiated. It comes packaged in a single box with 1pc/box and 10pcs/carton. Delivery time is typically 4-7 working days, and payment terms are T/T. The Sunmi V2S has a supply ability of 20000 pieces per month, ensuring that you can always get the devices you need for your business.

In conclusion, the Sunmi V2S is a powerful and versatile mobile POS terminal with NFC that can be used in a variety of different scenarios. Whether you run a coffee shop, a convenient store, a lottery store, a warehouse, or a bakery shop, the Sunmi V2S is the perfect tool for your business.
