Product Description

Advantages:

This is a modern design touch screen cash register, there are many advantages of this device.

- 1, The cash register is all in one, with 58mm printer and 80mm printer for option. In 58mm printer version, there is 7-segment display, while in the 80mm version, there is 4-inch IPS secondary display.
- 2, The cash register with 58mm printer can be powered by grid electricity and battery. The 2600mAh battery supporting over 4h battery life, the battery ensures stable device running under voltage fluctuation and power outage.
- 3, Easy to remove and maintain with the modular design.
- 4, Support customization, you can apply your Logo and brand color to your devices.

Product Description:

The desktop android cash register comes with a built-in battery of 2600mAh (in 58mm printer version only), ensuring that it can operate for hours without requiring an external power source. This feature makes it an ideal device for use in outdoor events, trade shows, and other similar venues. Additionally, the printer paper roll OD can be selected between 50mm and 60mm, depending on the user's preference.

The pos desktop printer is also equipped with a reliable print head that has a lifetime of up to 50km / 150km. This ensures that the device can produce high-quality receipts and other output materials without requiring frequent maintenance. The printer also features a compact and ergonomic design that allows it to fit seamlessly into any workspace, making it an ideal device for use in retail stores, restaurants, and other similar settings.

The mini size cash register product is designed to make the checkout process faster and more efficient. The device supports various payment modes, including NFC, magnetic stripe cards, and EMV chip cards. This makes it an ideal choice for businesses that want to provide their customers with a variety of payment options.

In conclusion, the Desktop cash register product is a reliable and efficient device that can simplify point-of-sale transactions. Its powerful processor, built-in battery, and Android 13 Sunmi OS make it an ideal choice for businesses that want to streamline their operations.

Whether you run a small retail store or a large restaurant, this desktop android pos terminal can help you improve your efficiency and provide a better customer experience.
