Product Description

Smart Desktop Terminal

SUNMI D3 MINI

Compact, loaded with features.

58mm version/80mm version（Presale）

Powered by SUNMI OS Compatible with SUNMI DMP

MINI in size, powerful inside.

Speed up your operations with the Qualcomm hexa-core processor, 3GB RAM+32GB ROM. Quick response and cache loading thanks to the high read and write speed of UFS 2.2. 58mm version comes with a built-in battery that features 4-hour runtime.

*Data from SUNMI Lab.

Visually appealing, incorporating ergonomics.

D3 MINI is small in size, light in weight and comes with a 10.1 inch screen and save more space. Its ergonomically inclined main screen is also designed for better user experience.

*The degree varies on the 80mm version due to the different printer size.

Reliability and convenience by design.

Easy to remove and maintain with the modular design. Rubber seals added to protect the printer from dust, liquid among other foreign objects.

Have your device tailored to your brand.

Apply your logo and brand color to the device to show your brand personality.

80mm version (Presale)

58mm version

Qualcomm HEXA CORE

UFS 2.2

Battery available (58mm version)

Product Description:

The desktop pc pos is powered by Android 13 Sunmi OS, which makes it a reliable and robust POS system. This operating system is designed to offer an intuitive and user-friendly interface that is easy to navigate, making it ideal for both occasional and regular users. The Android 13 Sunmi OS also provides seamless integration with third-party applications, ensuring that businesses can easily incorporate it into their existing workflows.

The desktop pos terminal features a printer that supports 58mm and 80mm paper rolls, making it easy to handle different printing requirements. Additionally, the printer paper roll OD is 50mm / 60mm, which ensures that it can handle a large volume of printing tasks. This feature is particularly useful for businesses that require a high volume of receipts or invoices.

The desktop touchscreen pos system is also designed with a Qualcomm Hexa-core processor that can run at speeds of up to 2.4GHz /1.9GHz. This processor ensures that the POS system can handle complex transactions and run multiple applications without any lag. This feature is particularly useful for businesses that require a high processing power for their daily operations.

Our desktop pc pos system is designed to be lightweight, weighing only 1.5kg. This feature ensures that businesses can easily move it from one location to another, making it ideal for businesses that require a portable POS system. The lightweight design also ensures that it takes up minimal space on the counter, making it an ideal choice for businesses with limited counter space.

Overall, our desktop touchscreen pos systems are the perfect choice for businesses that require a reliable and robust POS system. The desktop pos terminals are designed to offer seamless integration with third-party applications, making it easy for businesses to

incorporate it into their existing workflows. Additionally, the desktop pc pos system is designed with a powerful processor that ensures that it can handle complex transactions and run multiple applications without any lag. With a compact and lightweight design, the desktop pos system is a perfect choice for businesses that require a portable POS system without compromising on performance.
