- Highlight: **58mm POS Terminal All In One**, **Auto Cutter POS Terminal All In One**, **Qualcomm Hexa Core Sunmi POS Machine**

Product Description

Product Description:

The All in One Retail POS System is GMS certified, which means that it meets the highest standards of quality and performance. This certification ensures that the system is reliable, secure, and operates seamlessly. The system is powered by a Qualcomm Hexa-core processor, which provides fast and efficient performance. This processor is known for its speed and power, making it ideal for businesses that need a high-performance system.

The All in One Retail POS System comes with an 80mm printer with an auto cutter. This printer is designed to be fast and efficient, ensuring that customers do not have to wait long for their receipts. The auto cutter makes it easy to cut paper quickly and cleanly, reducing the need for manual cutting. This feature saves businesses time and money, making it an ideal choice for those looking for an efficient POS system.

The All in One Retail POS System is equipped with a built-in battery of 2600mAh, which provides ample power to keep the system running for extended periods without needing to be plugged in. This feature is particularly useful for businesses that need to move the POS system around or operate it in areas where there are no power outlets. This battery ensures that the system can operate seamlessly, even in areas with limited power supply.

Another great feature of the All in One Retail POS System is its customization options. We offer customized logos for businesses that want to add their branding to the system. This customization option provides businesses with a unique identity and helps to strengthen their brand. This feature is particularly useful for businesses that want to stand out from the competition.

In summary, the All in One Retail POS System is a full set all in one POS system with a thermal printer that is designed to meet the needs of businesses of all sizes. It is GMS certified, powered by a Qualcomm Hexa-core processor, and comes with an 80mm printer with an auto cutter. It also has a built-in battery of 2600mAh and offers customization options for businesses looking to add their branding to the system. With its comprehensive features, this POS system is ideal for businesses that want to streamline their operations and improve their customer experience.
