Product Description

Product Description:

The device comes with a card reader that supports TypeA&B Card, Mifare Card, Felica Card, and complies with ISO/IEC 14443 and ISO 15693 standards. This feature enables businesses to accept different payment options, making transactions seamless for both the customers and the business. With this device, businesses can easily manage their sales and inventory, as well as keep track of their transactions.

The All-in-One POS system has 2 SIM card slots that support 1.8V/3.0V, enabling businesses to stay connected to the internet and provide seamless customer service. The device runs on the Android 13 Sunmi OS, an optimized operating system that is designed for businesses. The system offers a customizable user interface that is easy to navigate, making it easy for businesses to manage their operations effectively.

This Android restaurant POS system all-in-one touch is designed to be user-friendly, making it easy for your employees to use. It helps businesses to increase their efficiency, reduce wait times, and enhance the overall customer experience. With its compact design, the All-in-One POS system is perfect for businesses with limited counter space.

In summary, the All-in-One POS system is an all-in-one solution that is designed to streamline your operations, enhance your customer experience, and increase your efficiency. It is an Android POS all-in-one system that is perfect for businesses of all sizes. With its advanced features, businesses can easily manage their sales, inventory, and transactions, making it an ideal solution for businesses that want to stay ahead of the competition.

Applications:

Convenient Store: The compact size of the Sunmi D3mini all-in-one pos machine makes it perfect for use in a convenience store. It can be placed on the counter without taking up too much space, and the touch screen display makes it easy for customers to select their items and pay for them. The built-in battery also ensures uninterrupted service even during power outages.

Coffee Shop: The Sunmi D3mini all-in-one touch screen pos system dual screen cas is also ideal for a coffee shop. The dual-screen design allows the customer to see their order and the total price, while the vendor can manage orders and process payments on the other screen. The device is also equipped with WIFI, making it easy to connect to the internet and process online payments.

Food Stall: The Sunmi D3mini all-in-one pos system is perfect for a food stall. The built-in battery ensures that the device can be used for hours without the need for a power source. The touch screen display makes it easy for customers to select their food items and pay for them, while the vendor can manage orders and process payments with ease.

Food Truck: The Sunmi D3mini all-in-one pos system is a great choice for a food truck. Its compact size and built-in battery make it easy to use in a small space without the need for a power source. The touch screen display allows customers to select their food items and pay for them, while the vendor can manage orders and process payments on the other screen.

The Sunmi D3mini all-in-one pos system is certified by CE, FCC, RoHs, and MSDS, ensuring its quality and reliability. It has a minimum order quantity of 2 units, with a negotiable price, and comes in a carton package. With a delivery time of 4-8 business days and payment terms of T/T and L/C, the Sunmi D3mini all-in-one pos system is a convenient and efficient choice for your business. It also has a supply ability of 15000 pieces per month, ensuring that it can meet your business needs. The device can connect to 2G, 3G, and 4G networks and is equipped with a Qualcomm Hexa-core processor. Its WIFI capability includes both 2.4GHz and 5GHz frequencies.

Support and Services:

The All in One POS product comes with technical support and services to ensure that you have a smooth and trouble-free experience. Our product technical support team is available to answer any questions you may have regarding the product, its features, and functionality.

In addition to technical support, we also offer various services to help you get the most out of your All in One POS product. These services include installation and setup, training and onboarding, and ongoing maintenance and updates.

Our team of experts is dedicated to providing you with the best possible support and services to ensure that your All in One POS product is running smoothly and efficiently.
