Product Description:

One of the key features of this Android 13 POS terminal is its large 15.6-inch screen, which provides a clear and vibrant display that is perfect for presenting menus, product catalogs, and other important information to customers. The screen is also highly responsive and supports multi-touch gestures, making it easy to navigate through menus and options quickly and efficiently.

Another important feature of this Sunmi D3 Pro Android POS systems terminal machine is its external memory, which includes 1*MicroSD (TF Card) Up To 1TB Supported. This provides ample space for storing important data, such as sales records, customer information, and inventory records, all of which can be easily accessed and managed through the device's intuitive user interface.

For businesses that require customized software solutions, this desktop Android POS terminal also comes with a free SDK that can be easily integrated into existing systems. This makes it easy to develop and deploy custom applications that can be used to streamline business operations and improve overall efficiency.

In summary, the Sunmi D3 Pro Android POS systems terminal machine is a powerful and versatile device that is ideal for use in a variety of business scenarios. With its Android 13 POS terminal, large 15.6-inch screen, external memory, and free SDK, this desktop Android POS terminal offers a wide range of features and capabilities that can help businesses improve their operations and increase their profitability.
