Product Description:

One of the most important features of our Payment POS product is its top-notch security. Our device is PCI, EMV, and Paypass certified, which means that it has passed rigorous security standards and protocols to ensure that your transactions are safe and secure. We take security seriously, and we understand how important it is to protect your customers' sensitive information.

Our Payment POS product is also equipped with the latest operating system, Android 11 Go Sunmi OS, making it a powerful and reliable device. This operating system is designed to provide you with a seamless and smooth user experience, so you can easily navigate through the different features and functions of our POS machine. With our e payment mobile POS machine, you can easily accept payments from your customers, manage your inventory, and generate reports with just a few clicks.

Another important feature of our Payment POS product is its high-quality camera. Our device comes with a front-facing 0.3MP FF camera (optional) and a rear-facing 5MP AF camera with a flashlight, which makes it easy for you to scan 1D/2D barcodes. This feature is especially useful for businesses that need to scan barcodes to track inventory or process payments. With our Payment POS product, you can quickly and easily scan barcodes, saving you time and increasing your efficiency.

Our Payment POS product also features a 5.5-inch touch screen display, which is designed to provide you with a clear and vibrant display. This display is easy to read, which makes it easy for you to navigate through the different functions and features of our POS machine. With our device, you can easily process payments, manage your inventory, and generate reports, all with just a few taps on the screen.

In addition, our Payment POS product features a removable battery with 7.6V/2540mAh capacity, which means that you can easily swap out the battery when it runs out of charge. This feature is especially useful for businesses that need to use the device for extended periods of time, as it ensures that you always have a backup battery on hand.

Overall, our Payment POS product is the perfect solution for businesses that need a reliable, secure, and efficient way to process payments. With its advanced features and user-friendly design, our POS machine system with printer payment makes it easy for you to manage your business and provide your customers with a convenient and hassle-free payment experience.

Applications:

The Sunmi P2 is made in China and has a minimum order quantity of 10 units, with a negotiable price. It comes in a packaging of 1pc/box and 10pcs/carton, and has a delivery time of 4-7 working days. Payment terms include T/T and L/C and it has a supply ability of 15,000 pieces per month.

The P2 has a 5.5-inch touch screen display and runs on Android 11 Go Sunmi OS. It has two memory options of 1GB RAM + 8GB ROM or 2GB RAM + 16GB ROM, and is powered by a Cortex-A53, quad-core processor.

The Sunmi P2 is perfect for various payment application occasions and scenarios. It can be used in retail stores, restaurants, cafes, and other businesses that require a reliable and secure POS payment device. With its EMV chip and PIN technology, customers can be assured of the safety and security of their transactions.

The NFC payment feature of the P2 also makes it ideal for businesses that want to offer contactless payment options to their customers. It reduces the risk of spreading germs and viruses, especially during the current global health crisis.

The receipt printer of the P2 also makes it a great choice for businesses that require a printout of the transaction details. This is especially useful for businesses that issue receipts for tax purposes, such as restaurants and cafes.

In conclusion, the Sunmi P2 is a versatile and reliable POS machine that is perfect for businesses that require a secure and efficient payment system. Its various features and certifications make it an excellent choice for businesses that want to offer their customers a safe and convenient payment option.
