Product Description

Product Description:

The Payment POS product is powered by Android 11 Go Sunmi OS, which is known for its user-friendly interface and security features. This makes it easy to use, even for non-tech-savvy individuals. It also ensures that your transactions are secure and protected from any potential threats.

The card reader of our pos terminal payment device is versatile and can accept EMV, Magstripe, and Contactless payments. This means that your customers can pay using their credit or debit cards, making transactions faster and more convenient. The Contactless feature also allows for a touchless payment experience, which is becoming more popular in the current times.

Our Payment POS product also comes with a camera that has a 0.3MP FF front camera (Optional) and a 5MP AF rear camera with a flashlight. This makes it easy to scan 1D and 2D barcodes, which is essential in the retail and restaurant industry. This feature also ensures that you can keep track of your inventory and sales, making it easier to manage your business.

In conclusion, our Payment POS product is the perfect device for businesses that require a reliable and secure payment solution. It is versatile, easy to use, and equipped with features that make it stand out from other card payment mini pos devices. With its Contactless feature, EMV, Magstripe, and Contactless payment options, and its ability to scan barcodes, our pos terminal payment device is a must-have for any business. Order yours today!
