Product Description

Product Description:

One of the key features of the T6900 is its versatile card reader, which is capable of processing payments from a range of sources including EMV, Magstripe, and Contactless cards. This means that you can accept payments from a wide range of customers, making it easy to increase your sales and grow your business.

Another great feature of the T6900 is its removable battery, which provides up to 2540mAh of power. This means that you can use the device for extended periods without needing to worry about running out of charge. And if the battery does run low, simply replace it with a fully charged battery to keep your payment processing running smoothly.

In addition to its powerful card reader and long-lasting battery, the T6900 also features a high-quality camera that is capable of capturing clear images and scanning barcodes in both 1D and 2D formats. This makes it easy to quickly and accurately process payments, even in busy retail environments where speed and efficiency are key.

Finally, the T6900 boasts a large, high-resolution touch screen that makes it easy to navigate the device's functions and settings. This means that even inexperienced users can quickly and easily process payments without needing extensive training or technical knowledge.

Overall, the T6900 is a versatile and reliable card reader payment POS terminal that is perfect for businesses of all sizes. Whether you're looking to process payments quickly and efficiently, or simply want to streamline your payment process and reduce your workload, the T6900 is the ideal choice.

Applications:

Our Payment POS is a versatile device that is specifically designed to cater to the payment needs of businesses. It is equipped with powerful hardware that is capable of processing payments quickly and efficiently. The Cortex-A53 Quad-core processor ensures smooth and fast payment processing, while the Android 11 Go Sunmi OS provides a user-friendly interface that makes it easy for both customers and merchants to operate.

The Sunmi Payment POS is also equipped with a front 0.3MP FF camera (optional), a rear 5MP AF + flashlight, and 1D/2D barcode scanning capabilities to ensure accurate and speedy payment processing. It is also certified with CE, FCC, RoHS, MSDS, EMV, Paypass, and PCI, ensuring that it meets all the necessary quality standards for a payment POS device.

The Sunmi Payment POS is an ideal device for financial institutions and retailers who want to provide their customers with a seamless payment experience. With its compact design, it can easily fit on a counter or desk, making it easy for customers to use. It is also an excellent choice for public transportation systems, where it can be used as a bus payment POS, allowing passengers to make quick and easy payments.

Our product is available for purchase with a minimum order quantity of 10 and a negotiable price. Each device comes packaged in a box, with 10 devices per carton. We have a supply ability of 15,000 pieces per month, ensuring that you will never run out of stock. Our delivery time is 4-7 working days, and we accept payment terms of T/T and L/C.

The Sunmi Payment POS is powered by a removable battery of 7.6V/2540mAh and comes with an AC power adapter as a power source. With its powerful hardware, user-friendly interface, and versatile payment processing capabilities, the Sunmi Payment POS is the ultimate solution for all your payment transaction needs.
