Product Description

Charging base for option

Product Description:

Introducing our versatile Payment POS product, perfect for bus payment POS systems, taxi payment POS terminals, or any payment POS terminal needs you may have. This product boasts a variety of features to make transactions easy and efficient.

One of the standout features of our Payment POS product is its EMV Chip and PIN technology. This ensures safe and secure transactions for both you and your customers. Additionally, NFC payments are also supported, allowing for quick and convenient payments via mobile devices.

The card reader on this product is top-of-the-line, supporting EMV, magstripe, and contactless payment options. This ensures that you can accept payments in any form that your customers prefer.

Our Payment POS product also comes equipped with a camera, featuring a front-facing 0.3MP FF camera (optional) and a rear-facing 5MP AF camera with a flashlight. This allows for easy barcode scanning, with support for both 1D and 2D barcodes. This makes it perfect for businesses that need to scan items for inventory or pricing purposes.

Powering this product is an AC power adapter, ensuring that it is always ready to go when you need it. The processor on our Payment POS product is a powerful Cortex-A53, quad-core processor, ensuring speedy and efficient transactions.

With all of these features, our Payment POS product is the perfect choice for any business that needs a reliable and efficient payment terminal. Whether you're running a bus payment POS system, a taxi payment POS terminal, or any other payment POS terminal, our product has you covered.
