Charging base for option

Product Description:

The Data Collector Handheld features a trigger handle for easy and comfortable use, making it more ergonomic and reducing the risk of hand fatigue. This feature is optional, giving users the flexibility to choose whether they want to use it or not.

For those who want to use it continuously without worrying about battery life, the device also comes with an optional charging base. This ensures that the device is always charged and ready to use whenever you need it.

One of the most impressive features of the Data Collector Handheld is its memory capacity. It comes with various options, including 3GB RAM+32GB ROM, 4GB RAM+64GB ROM, and 6GB RAM+128GB ROM. This means that you can choose the most suitable option for your business needs and have enough memory to store all your important data.

The device also comes with a removable polymer lithium battery, which has a capacity of 3.8V/5000mAh. This ensures that the device has enough battery life to last throughout the day, even with heavy use. Users can easily replace the battery when necessary, making it more convenient and cost-effective in the long run.

For those who require more advanced features, the Data Collector Handheld also has an optional UHF trigger handle. This feature enables users to collect and manage data from a wider range, making it more versatile and efficient.

In summary, the Data Collector Handheld is a highly advanced device that is designed to make data collection and management more efficient and accurate. With its trigger handle, optional charging base, impressive memory capacity, removable battery, and optional UHF trigger handle, it is the ideal tool for businesses in various industries. Get yours now and take your data management to the next level!

Applications:

The Sunmi L2ks is a versatile device that can be used in many different industries. It is ideal for retail stores, warehouses, distribution centers, and logistics companies. This data collector can help with inventory management, order picking, and shipping processes. With its ability to read scratched, stained, and crinkled barcodes up to 1m away, even on high shelves in your warehouse, this device makes inventory management easier and more accurate.

The 5.5" HD touch screen on the Sunmi L2ks allows for easy navigation and data entry. The device is also built to withstand tough environments with an IP68 protection standard. This means that it is water-resistant and can withstand dust and dirt. The Cortex-A53, Octa-core processor ensures that the device runs smoothly and quickly.

The Sunmi L2ks is also GMS certified which means that it meets Google's performance requirements and properly runs Google apps. This device is supplied with a packaging detail of 1pc/box and 15pcs/carton, and has a delivery time of 4-7 working days. Payment terms can be made through T/T or L/C and the supply ability of this product is 20000 pieces per month.

In conclusion, the Sunmi L2ks data collector is a reliable and efficient device that can be used in various industries. Its ability to read barcodes up to 1m away, its IP68 protection standard, and its GMS certification make it a top-notch product. It is an excellent option for businesses that want to improve their inventory management, order picking, and shipping processes.
