Product Description

Product Description:

The trigger handle for option provides a comfortable grip for extended use, while the professional 2D scan engine ensures quick and accurate scanning of barcodes and other data. Whether you're working in a warehouse, retail store, or other location, this data collector will help you get the job done quickly and efficiently.

The device operates on Android 12 Sunmi OS, providing a user-friendly interface and seamless integration with your existing systems. Plus, with the ability to read scratched, stained, and crinkled barcodes up to 1m away, even on high shelves in your warehouse, you can be confident that this data collector will provide reliable performance in any environment.

Whether you're looking for a reliable solution for inventory management, asset tracking, or other data collection tasks, the PDA data collector is the ideal choice. So why wait? Invest in this powerful and versatile device today and start taking control of your data collection processes!

Features:

Product Name: Data Collector

Scanner: Professional 2D Scan Engine

Applications:

The Sunmi L2S pro data collector runs on Android 12 Sunmi OS, which is a powerful operating system that enables users to perform multiple tasks without any lag. With this device, users can quickly and easily gather and input data, making it ideal for inventory management, asset tracking, and many other applications. The device is equipped with a scanner that can read scratched, stained, and crinkled barcodes up to 1m away, even on high shelves in your warehouse. With the option of a trigger handle, the device can be used as a total station data collector, making it perfect for construction and surveying applications.

The Sunmi L2S pro handheld data collector is an ideal tool for businesses that require fast and accurate data collection and management. It is perfect for use in warehouses, logistics, retail, healthcare, hospitality, and many other industries. With its Android operating system, users can easily download and install apps to customize the device for their specific needs. The device is lightweight and easy to carry, making it an excellent tool for fieldwork and on-the-go data collection.

In summary, the Sunmi L2S pro data collector is a versatile and powerful device that can be used in a wide range of applications. Its Android operating system, scanner reading ability, and trigger handle option make it a perfect tool for total station data collection. It is a reliable and safe product that has obtained all the necessary certifications, and with a minimum order quantity of 1, it is accessible to businesses of all sizes.

Support and Services:

The Data Collector is a powerful tool for collecting data and managing it efficiently. We are committed to providing top-notch technical support and services to ensure that our customers can make the most of this product.

Our technical support team is available to answer any questions you may have about the Data Collector. We can help you troubleshoot any issues you encounter and provide guidance on how to optimize the product for your specific needs.

In addition to our technical support services, we also offer training and consulting services to help you get the most out of the Data Collector. Our team of experts can provide customized training sessions to ensure that you and your team are fully equipped to use the product effectively. We also offer consulting services to help you develop and implement data collection strategies that align with your business objectives.

At the Data Collector, we are committed to providing exceptional customer service. Contact us today to learn more about our technical support and services.

Packing and Shipping:

Product Packaging:

The Data Collector product will be carefully packed in a sturdy box to ensure its safe delivery. The box will be labeled with the product name, model number, and any other relevant information, as well as instructions for handling and storage.

Shipping:

Our standard shipping method for the Data Collector product is ground shipping via a reputable carrier. Shipping costs will be calculated based on the destination and weight of the package. Expedited shipping options are available for an additional fee. Once your order has shipped, you will receive a tracking number so you can monitor the delivery status of your package.
