Product Description

Product Description:

One of the standout features of this data collector is the optional Trigger Handle. This Trigger Handle For Option provides users with an ergonomic grip and a convenient trigger button for easy scanning and data collection. This makes the Handheld Pda an ideal choice for businesses that require frequent scanning and data collection.

For those who require even more functionality from their data collector, the Handheld Pda also has an optional UHF Trigger Handle. This handle allows users to easily scan barcodes from longer distances, making it ideal for warehouse and inventory management applications.

With the optional Charging Base, keeping this data collector handheld powered up and ready to go is a breeze. Simply place the device in the charging base, and it will automatically begin charging. This makes it easy to keep the Handheld Pda powered up and ready for use whenever it is needed.

In conclusion, the Handheld Pda is a powerful and versatile data collector that is perfect for businesses that require efficient and accurate data collection. Whether you need a simple scanner or a more advanced device for inventory management, the Handheld Pda has you covered. So why wait? Order your Handheld Pda today and start streamlining your data collection processes!

This portable data collector is a rugged PDA that also functions as a credit card data collector.

Applications:

The Sunmi L2S pro is a powerful mobile data collector that is designed to offer convenience, efficiency and accuracy to users. With its high-quality features and certifications such as CE, FCC, RoHS, and MSDS, this product is trusted by professionals in various sectors. Here are some of the product application occasions and scenarios:
Data Collector Surveying

The Sunmi L2S pro is an ideal data collector for surveying purposes. Its 5.5" HD touch screen and Cortex-A53, Octa-core processor make it easy to input and analyze data on the go. With its IP68 protection standard, this device is able to withstand harsh environments and conditions. The removable polymer lithium battery (3.8V/5000mAh) ensures that the device lasts long enough to complete a survey without the need for recharging. The Sunmi L2S pro can be used for collecting data in various fields such as agriculture, environmental management, and construction among others.
Credit Card Data Collector

The Sunmi L2S pro is also a credit card data collector. It is equipped with a high-speed 4G network and a built-in NFC reader that allows for easy and secure payment transactions. The device's touch screen and fast processor ensure that transactions are processed quickly and accurately. With its supply ability of 20000 pieces per month, this device is perfect for businesses that require multiple credit card data collectors.
Other Occasions and Scenarios

The Sunmi L2S pro can be used for various other occasions and scenarios such as inventory management, logistics, and retail. Its compact design and packaging details of 1pc/box, 15pcs/carton make it easy to transport and store. The device's delivery time of 4-7 working days ensures that users receive their products in a timely manner. The payment terms of T/T and L/C make it easy for users to acquire the device. Additionally, the minimum order quantity is only 1, making it accessible to individuals and small businesses.

Support and Services:

The Data Collector product includes technical support and services such as:
Installation support and guidance
Product updates and patches
Troubleshooting assistance
System performance analysis and optimization
Training and education resources
Integration support for third-party applications
Remote assistance and support
Hardware and software maintenance

Packing and Shipping:

Product Packaging:
The Data Collector product will be packaged securely to ensure safe delivery. It will be placed in a sturdy box with cushioning material to prevent any damage during transit.
Shipping:
We offer standard shipping for all orders of the Data Collector product . Orders will be shipped within 3-5 business days and will take approximately 4-8 business days to arrive. Expedited shipping options are also available for an additional fee.
