## Product Description

### Product Description:

Our Smart Payment Kiosk is available in both wall-mounted and floor-standing installation types, making it highly versatile and easy to install in any location. This pos terminal kiosk is perfect for businesses looking to streamline their payment processes and reduce the need for manual transactions.

One of the standout features of our Smart Payment Kiosk is its support for QR code payment, which has become increasingly popular in recent years. With this feature, customers can simply scan a QR code using their smartphone to complete a payment transaction, making the process faster and more convenient than ever before.

In addition to QR code payment, our Smart Payment Kiosk can also be attached to a financial POS to support bank card payments. This makes it a highly versatile option for businesses looking to cater to a range of payment preferences.

Our Smart Payment Kiosk also comes equipped with an 80mm thermal printer with auto cutter, which makes it easy to print out receipts and other important documents. This feature ensures that customers can keep track of their transactions and have a record of their purchases.

Overall, our Smart Payment Kiosk is a smart kiosk that is perfect for businesses looking to streamline their payment processes and provide their customers with a seamless checkout experience. With its support for QR code payment, bank card payments, and its 80mm thermal printer with auto cutter, this kiosk is a highly versatile option that is sure to impress.

## Applications:

**Fast Food Store Ordering Kiosk:** Sunmi K2 is an ideal payment kiosk for fast food stores and restaurants. It can be used for self-service ordering, payment processing, and receipt printing. Customers can easily select their food items, customize their orders, and pay using different payment methods such as cash, credit card, or mobile payment. The kiosk is equipped with a fast and reliable POS terminal that ensures secure and accurate transactions.

**Payment Kiosk with POS Terminal:** Sunmi K2 is a complete payment solution that combines a payment kiosk with a POS terminal. It can be used in retail stores, supermarkets, and other businesses that require fast and efficient payment processing. The kiosk supports different payment methods such as credit card, debit card, mobile payment, and QR code scanning. It also has a built-in printer for receipt printing and a large display for customer interaction.

**Gas Station Kiosk:** Sunmi K2 can be used as a payment kiosk in gas stations. It can be used for fuel payment, car wash payment, and other services that require payment processing. The kiosk is easy to use and supports different payment methods. It also has a large display that can show promotional messages and offers to customers.

**Catering Version:** Sunmi K2 is available in a catering version that is designed for food and beverage businesses. It comes with a built-in scanner for food item barcodes and a printer for order tickets. The kiosk can also be customized to include a loyalty program, special offers, and other features that enhance customer experience.

**Retail Version:** Sunmi K2 is available in a retail version that is designed for retail stores and supermarkets. It comes with a built-in scanner for product barcodes and a printer for receipts. The kiosk can also be customized to include a product catalog, special offers, and other features that enhance customer experience.

**Healthcare Version:** Sunmi K2 is available in a healthcare version that is designed for hospitals, clinics, and pharmacies. It comes with a built-in scanner for medical cards and passports and a printer for receipts. The kiosk can also be customized to include a patient registration system, prescription refills, and other features that improve healthcare services.

With its advanced features and functions, Sunmi K2 is a reliable and efficient payment kiosk that can be used in various application occasions and scenarios. It is certified by CE, FCC, and RoHS, and has a minimum order quantity of 1. The price is negotiable, and the packaging details are 1pc/box. The delivery time is 4-7 working days, and the payment terms are T/T or L/C. The supply ability is 10000 pieces per month. The kiosk runs on Android 7.1 or Android 9.0 Sunmi OS and has a 24" 1080×1920 FHD G + G capacitive screen that supports 10 touch points. It also has 4GB RAM + 16GB ROM or 4GB RAM + 32GB ROM memory.
