Product Description:

The kiosk is available in three versions: catering, retail, and healthcare, each designed to meet the specific requirements of different industries. The catering version is ideal for restaurants and other food service businesses, with features such as a 24" touch screen display and optional integrated POS terminal. The retail version is perfect for retail stores and supermarkets, with a compact design that can be easily integrated into existing checkout systems. The healthcare version is specifically designed for hospitals and other healthcare facilities, with features such as a built-in scanner for medical cards and a secure payment processing system.

Whichever version you choose, the Smart Payment Kiosk is designed to make payment processing as fast and easy as possible. With a range of payment options, including card payments, mobile payments, and QR code payments, customers can choose the method that suits them best. And with a 24" touch screen display, the kiosk is easy to use, even for customers who are not familiar with the technology.

The Smart Payment Kiosk is also equipped with a range of connectivity options, including 1× Micro-USB Debug Port and 5× USB TypeA Port, making it easy to integrate with other systems and devices. And with its sturdy construction and durable materials, the kiosk is built to last, even in high-traffic environments.

Overall, the Smart Payment Kiosk is an essential tool for any business that wants to offer fast, secure, and convenient payment processing to its customers. Whether you are a restaurant, retail store, supermarket, gas station, or hospital, the Smart Payment Kiosk is the perfect solution for your payment needs.

Applications:

The Sunmi K2 Payment Kiosk is a smart and efficient self-service checkout kiosk machine that can be used in a variety of scenarios and occasions. Its functions include shelf check-out payment, receipt printing, payment code scanning, passport reading, and medical card reading. The K2 Payment Kiosk is made in China and has been certified by CE, FCC, and RoHs. It has a minimum order quantity of 1 and the price can be negotiated. It is packaged with 1pc/box and takes 4-7 working days to be delivered. Payment terms accepted are T/T and L/C. The supply ability is 10,000 pieces per month.

The Sunmi K2 Payment Kiosk is ideal for fast food store ordering kiosks. Customers can use the K2 to place their order and make payment without having to interact with a cashier. This speeds up the ordering process and reduces wait times. The K2 can also be used as a POS terminal kiosk in retail stores. Customers can make payments and print receipts with ease. The K2 can also be used in government offices where passport and medical card reading is required.

The Sunmi K2 Payment Kiosk can be installed in two ways: wall-mounted or floor-standing. This allows it to be placed in a variety of locations and scenarios to suit different needs. The K2 also supports 1D, 2D, mobile screen, and printed barcodes, making it easy for customers to scan payment codes. It has 1× Micro-USB Debug Port and 5× USB TypeA Port, which makes it easy for developers to debug and test applications.

In summary, the Sunmi K2 Payment Kiosk is a versatile and efficient self-service checkout kiosk machine. It is ideal for fast food store ordering kiosks, retail stores, and government offices. Its functions include shelf check-out payment, receipt printing, payment code scanning, passport reading, and medical card reading. It can be installed in two ways: wall-mounted or floor-standing. It supports 1D, 2D, mobile screen, and printed barcodes, and has 1× Micro-USB Debug Port and 5× USB TypeA Port.
