Product Description:

One of the key features of this payment kiosk is its ability to support QR code payment. Customers can simply scan the code displayed on the screen with their mobile devices and complete their transactions instantly. Additionally, this smart payment kiosk also comes with a financial pos that can support bank card payments. This ensures that customers can choose their preferred mode of payment and complete their transactions without any hassle.

The Smart Payment Kiosk is equipped with a range of functions that make it an ideal solution for a variety of industries. It can be used for payment check-out, receipt printing, payment code scanning, ID card reading, and medical card reading. This makes it a versatile solution that can be used in retail stores, hospitals, and other settings where fast and secure payments are required.

In addition, this payment kiosk also comes with a superior barcode reader that offers increased performance. This ensures that customers can scan their barcodes quickly and easily, without any errors or delays. The result is a faster and more efficient payment check-out process that can help businesses improve their customer satisfaction levels.

Overall, the Smart Payment Kiosk is a reliable and efficient solution for businesses looking to streamline their payment check-out process. With its support for QR code payment, financial pos, and a range of other functions, this qr pos printer payment kiosk is a must-have for any business looking to provide a seamless and secure payment experience for their customers.

Applications:

One of the main functions of the Sunmi K2 is payment check-out. This kiosk is equipped with a payment code scanner, which allows customers to quickly and easily pay for their purchases using their mobile phones. The kiosk also has a QR POS printer, which can print receipts for customers to keep for their records.
In addition to payment processing, the Sunmi K2 also has the capability to read ID and medical cards. This makes it an ideal solution for medical offices and other businesses that need to verify customer identities.
The Sunmi K2 is designed to be easy to install and can be mounted on a wall or placed on the floor. Its six-core 1.8GHz processor ensures that it runs smoothly, even with multiple applications running at the same time. With 4GB RAM and 16GB or 32GB ROM, this kiosk has plenty of memory to store data and run applications.
The Sunmi K2 is certified by CE, FCC, and RoHs, ensuring that it meets the highest standards for quality and safety. It is available for a minimum order quantity of 1, with pricing to be negotiated. Each kiosk comes packaged in a single box and can be delivered within 4-7 working days. Payment terms include T/T and L/C, and the kiosk has a supply ability of 10,000 pieces per month.
Overall, the Sunmi K2 is a powerful and versatile self-service payment and ordering kiosk POS. With its advanced features, including payment code scanning, receipt printing, and ID and medical card reading, it is perfect for a wide range of businesses and industries.
