Product Description:

The mini POS terminal comes with a memory of 2GB RAM + 16GB ROM or 3GB RAM + 32GB ROM depending on the user's needs. This enables the device to run smoothly without any lags or delays. It can be used to store large amounts of data such as sales records, inventory records, and more. This feature ensures that the device can be used for a variety of purposes such as sales, inventory management, and more.

The mini POS terminal supports more than 200 languages which makes it ideal for use in different countries and regions. This feature ensures that users can interact with the device in their local language which makes it easier to use.

The mini POS terminal is customizable and supports OEM/ODM. This feature allows businesses to customize the device to meet their specific needs. They can add their logo, change the color, or customize the software to suit their business needs. This ensures that the device is unique and stands out from the competition.

The mini POS terminal can be used as a bus ticket POS terminal. This feature makes it ideal for use in the transportation industry. It can be used to issue and print bus tickets which makes it easy for passengers to purchase tickets. This feature ensures that the device can be used in different industries which makes it versatile.

Features:

Product Name: POS Terminal
CPU: Cortex-A53 Octa-Core
Language: Support More Than 200 Languages
