Product Description

Product Description:

One of the key features of our Desktop POS is its hidden cabling, which ensures that the device looks neat and organized, making it ideal for a professional setting. Additionally, our POS system comes with a flipable main display that makes it easier for customers to interact with the device and for your employees to use.

Another standout feature of our Desktop POS is its camera, which is a front camera with a single lens and 8 MP resolution. This allows your employees to take high-quality images of your products and customers, which can be used for marketing and promotional purposes. The POS system is built with an NFC on-screen card reader, which enables customers to make payments using their mobile devices.

This is a convenient and secure payment option that is becoming increasingly popular among customers.

In terms of structure, our Desktop POS is made from high-quality aluminum alloy, which is durable and long-lasting. This ensures that your investment in our POS system will pay off in the long run, as you won't have to worry about it breaking down or malfunctioning.

Lastly, our Desktop POS is equipped with Wi-Fi capabilities, with 2.4GHz, 5GHz, and 6GHz frequencies. This ensures that your POS system stays connected to the internet, allowing you to access important data and information in real-time.

Overall, our Desktop Android POS Machine is the ideal POS system for restaurants that are looking to enhance their business operations and provide a better experience to their customers. With its hidden cabling, flipable main display, camera, NFC on-screen card reader, and Wi-Fi capabilities, our POS system is a complete solution that will help take your business to the next level.
