Applications:

One of the key features of the Sunmi V3 mix is its professional scanner, which is integrated with a 1D/2D barcode scanning system. This makes it easy to input product information and track inventory, which is particularly useful for businesses that deal with a large volume of products. The scanner is also highly accurate, ensuring that you get reliable data every time.

In addition to its scanning capabilities, the Sunmi V3 mix also supports NFC card reading. This makes it easy to accept payments from customers who prefer to use contactless payment methods, such as Apple Pay or Google Wallet.

The Sunmi V3 mix is a smart mobile POS system terminal that is designed to be used in a variety of settings. It is ideal for businesses that need to process transactions quickly and efficiently, such as retail stores, restaurants, and cafes. Its compact size and handheld design make it easy to use, even in small spaces.

The Sunmi V3 mix runs on the Android 13 Sunmi OS, which is highly customizable and easy to use. It supports multiple languages, including English, Chinese, Spanish, French, and German, making it a great choice for businesses that operate in multiple countries.

The Sunmi V3 mix is certified by CE, FCC, RoHs, and MSDS, ensuring that it meets high standards for quality and safety. It has a minimum order quantity of 10, and the price is negotiable based on your needs. It comes packaged in a box with 1pc, and 5pcs per carton. Delivery time is 4-7 working days. Payment terms are T/T and L/C, and the supply ability is 15000 pieces per month.

In summary, the Sunmi V3 mix is a smart POS terminal android handheld POS that is perfect for businesses looking for a reliable and efficient POS system. Its scanning capabilities, support for NFC card reading, and easy-to-use interface make it a great choice for a variety of applications.
