Product Description

Product Description:

One of the key features of this smart pos product is its built-in 58mm and 80mm thermal printer for option. This means that you can easily print receipts for your customers without the need for an external printer. This can save you time and money, while also improving the efficiency of your business operations.

Another great feature of this smart pos product is its professional scanner, which is integrated with 1D/2D barcode scanning supported. This scanner can help you quickly scan items, making it easier for you to keep track of your inventory and sales. It can also improve the accuracy of your transactions, which can lead to increased customer satisfaction.

If you need to keep your smart pos device charged, you can opt for the charging cradle for option. This can ensure that your device is always ready to use, so you don't have to worry about running out of battery during peak business hours.

When it comes to payment options, this smart pos product has you covered. It supports mobile wallet and NFC payments, making it easy for your customers to pay using their preferred method. This can also help you increase your sales and revenue, as you can serve more customers and offer more payment options.

The touch screen type of this smart pos product is a 10.1 inch HD 1280*800 IPS touch screen. This offers a clear and vibrant display, making it easy for you to navigate and use the device. It also makes it easier for your customers to view their transactions and receipts, improving their overall experience.

In summary, the 10.1 inch tablet pos smart is an Android smart pos terminal that can help you improve your business operations and customer experience. With its built-in thermal printer, professional scanner, charging cradle, and payment options, this smart pos all in one device has everything you need to take your business to the next level.
