Product Description

Product Description:

The Payment POS comes with a versatile card reader that supports NFC, Magstripe, and IC Card payments, making it compatible with a wide range of payment methods. This pos terminal payment handheld is designed to be user-friendly, ensuring that your customers can easily complete transactions with ease.

The Payment POS also features a front camera with 0.3MP and FF 1D/2D Barcode Scanning capabilities. This feature allows you to scan barcodes and QR codes quickly and efficiently, making it easier to process payments. Additionally, the 5MP FF camera is optional if photo-taking is necessary.

This payment machine pos runs on the Android 9.0 Sunmi OS, ensuring that you have access to all the latest features and security updates. The Cortex-A53 Quad-core 1.3GHz processor ensures that the Payment POS runs smoothly and efficiently, even during peak hours.

The Payment POS also features multi-option payment support, allowing your customers to choose the payment method that works best for them. This pos payment machine is designed to be flexible, making it an ideal solution for businesses of all sizes.

Overall, the Payment POS is the perfect solution for businesses looking for a reliable, efficient, and secure payment processing solution. With its versatile card reader, advanced camera capabilities, and multi-option payment support, this pos terminal payment handheld is the ideal choice for any business looking to streamline their payment processing system.

This is a handheld pos terminal payment device with mobile pos terminal and payment pos machine capabilities. It is also suitable for game card payment terminal.

Applications:

The Sunmi P2 Smartpad is a versatile and efficient mobile payment machine portable android pos system designed for a variety of payment scenarios. Equipped with 1GB RAM + 8GB ROM or 2GB RAM +16GB ROM memory, the P2 smartpad can handle multiple applications with ease. Its PCI PTS 6.x certification ensures secure and reliable payment transactions for both merchants and customers. The P2 smartpad is perfect for retail stores, allowing merchants to accept payments quickly and easily. With its 1D/2D barcode scanning and photo-taking capabilities, it can also be used for inventory management and price checking. The device's portability makes it ideal for pop-up shops and markets, allowing merchants to take payments on-the-go.

Banks can also benefit from the P2 smartpad's capabilities. The device can be used for customer onboarding, account management, and loan applications. Its 5MP camera allows for ID scanning and verification, while its secure payment processing ensures customer data is protected.

Restaurants can use the P2 smartpad as a pos payment machine. With its Android 9.0 Sunmi OS, orders can be taken and payments processed quickly and efficiently. The device's ability to print receipts and its compact size make it perfect for tableside payments.

The P2 smartpad can also be used for lottery sales. Its 1D/2D barcode scanning capabilities allow for quick and accurate ticket verification, while its secure payment processing ensures the safety of transactions.

The Sunmi P2 Smartpad is a reliable and efficient mobile payment machine portable android pos system that can be used in a variety of scenarios. Its certifications and capabilities make it a secure and versatile choice for merchants, banks, restaurants, and lottery sales. The minimum order quantity is 10, and the packaging details are 1pc/box,10pcs /carton. The delivery time is 4-7 working days, and payment terms include T/T and L/C. The supply ability is 15000 pieces per month, and the price can be negotiated.

Support and Services:

Our Payment POS product comes with comprehensive technical support and services to ensure that our customers have a smooth experience. Our technical support team is available 24/7 to assist with any issues that may arise. We also offer on-site installation and training services to ensure that our customers are able to use the product to its full potential. Additionally, we provide regular software updates to ensure that our product remains up-to-date and secure.

Packing and Shipping:

Product Packaging:

The Payment POS product will be packaged securely in a cardboard box with bubble wrap to ensure that it arrives in perfect condition.

Shipping:

The Payment POS product will be shipped within 12-5 business days of receiving the order. We offer free standard shipping within the United States, which typically takes 5-7 business days to arrive. Expedited shipping options are also available for an additional fee.
