- Highlight: **Feature Rich Pinpad Android Payment Terminal , Bank Android Payment Terminal, Feature Rich Pinpad Android NFC POS**

### Product Description:

One of the standout features of the Payment POS is its multi-option payment support. This means that you can accept payments from a variety of sources, including NFC, magstripe, and IC cards. This versatility ensures that you can accommodate your customers' preferred payment methods, making their shopping experience more seamless and enjoyable.

The Payment POS also boasts impressive memory capabilities. You can choose from two options: 1GB RAM + 8GB ROM or 2GB RAM + 16GB ROM. This means that you can store all of the data and applications you need to run your business without worrying about running out of space.

Another great feature of the Payment POS is its card reader. With NFC, magstripe, and IC card compatibility, you can easily accept payments from all types of cards. This makes the Payment POS a versatile and functional payment machine POS for any business.

The Payment POS runs on the Android 9.0 Sunmi operating system, which is known for its stability and user-friendliness. This means that you can easily install and use any compatible apps that you need to run your business, making the Payment POS a customizable and flexible choice for any business owner.

In summary, the Payment POS is an all in one POS payment solution that is perfect for any business in need of a POS with payment capabilities. With its powerful processor, multi-option payment support, ample memory, versatile card reader, and user-friendly operating system, the Payment POS is a reliable, efficient, and customizable payment machine POS that can help you run your business more smoothly and efficiently.
