## Product Description

### Product Description:

One of the main advantages of the Android POS Terminal is its versatility, as it can be used in a variety of scenarios such as restaurants, apparel stores, and jewelry shops. The system is specifically designed to simplify the checkout process, making it quicker and more efficient for both customers and employees.

The Android POS Terminal comes with the option of NFC Tap On Glass To Support, which allows for a seamless payment experience for customers. The terminal also features TMS (Terminal Management System), which enables businesses to remotely monitor and manage multiple terminals from a single location.

The Android POS Terminal operates on the latest Android 13 Sunmi OS, which provides a stable and secure operating system for businesses. The system is designed to be user-friendly and easy to navigate, making it ideal for businesses of all sizes.

Overall, the Android POS Terminal is a reliable and efficient solution for businesses in need of a point-of-sale system. Its flat capacitive touch screen, NFC option, and TMS make it a top choice for businesses looking to streamline their checkout process and improve customer satisfaction.

\*This feature is optional

Connect a secondary display  
with a USB cable and offer the  
best interaction experience to  
your customers.

### Applications:

One of the best features of the Sunmi D3pro Android POS is its 15.6-inch display, which is perfect for showing transaction details to customers. Its large screen makes it easy for customers to verify the purchase details, which reduces the chances of errors and miscommunication.

This terminal Android POS is also equipped with a Qualcomm Hexa-core processor that can go up to 2.4GHz, making it a high-performance device that can handle multiple tasks at once. Furthermore, its cloud management platform allows for easy device

management, making it an ideal choice for businesses with multiple locations.

The Sunmi D3pro Android POS has different apps in its app store for clients to choose from, making it a versatile device that can cater to various industries. It is perfect for restaurants, apparel stores, and jewelry shops, to name a few.

Restaurants can benefit from the Sunmi D3pro Android POS by streamlining their ordering and payment processes, making transactions more efficient and reducing wait times. Apparel stores can use this device to manage their inventory and sales, while jewelry shops can use it to showcase their products on the large screen and process transactions seamlessly.

Moreover, the Sunmi D3pro Android POS is certified by CE, FCC, and RoHS, ensuring its quality and safety. It has a minimum order quantity of one, with the price to be negotiated. Each unit comes in one carton, with a delivery time of 3-7 working days for samples and bulk orders to be discussed. Payment terms are either T/T or L/C, and the supply ability is 20,000 pcs per month.
