## Product Description

### Product Description:

One of the standout features of this Android terminal POS machine is its external memory. With 1\*MicroSD (TF Card) up to 1TB supported, you'll have ample storage space for all your data needs. This allows you to store a vast amount of information, including sales data, inventory, and customer information, all in one convenient location.

Another great feature of the Smart Desktop Terminal is the free SDK offered for software integration. This means that you can easily customize the terminal to suit your specific business needs. Whether you need to integrate with your existing software or develop a new solution from scratch, the free SDK makes it easy to get started.

The Smart Desktop Terminal also comes with TMS (Terminal Management System), which allows you to remotely manage all your terminals from a central location. This makes it easy to keep track of all your transactions and ensure that everything is running smoothly across all your devices.

Finally, the Smart Desktop Terminal features 1\*Power Button (Lock Screen; Fingerprint Recognition Optional), which allows you to secure your device and protect your data. This button also allows for optional fingerprint recognition, which can streamline the checkout process and improve security.

Overall, the Smart Desktop Terminal is an incredible Android supermarket POS terminal that offers a range of powerful features and capabilities. Whether you're a small business owner or a large corporation, this terminal is sure to meet all your point of sale needs. So why wait? Invest in the Smart Desktop Terminal today and take your business to the next level!
