Product Description

Product Description:

The terminal management system (TMS) is a key feature of this Android POS machine, which allows businesses to manage their devices remotely. With the TMS, businesses can update software, monitor device performance, and troubleshoot issues, all from a centralized location.

The Android POS machine also comes with external memory in the form of a MicroSD (TF Card) that can support up to 1TB. This allows businesses to store large amounts of data and run multiple applications simultaneously without any performance issues.

The screen size of 15.6 inches is suitable for most businesses, providing ample space for employees to operate the device and customers to view information. The large screen also makes it easy for customers to interact with the device, increasing customer satisfaction and improving business operations.

The Android POS machine is suitable for various industries, including catering, retail stores, transportation, and lottery. Whether you are running a food truck, a convenience store, a taxi service, or a lottery booth, this device can help streamline your operations and improve customer experience.

In summary, the Android POS machine is a desktop Android POS terminal that is packed with features to help businesses operate efficiently. With its powerful operating system, terminal management system, external memory, and large screen size, this device is suitable for various industries and can help businesses achieve their goals.
