Touch Screen Cash Register Android 13**

#### Product Description

## Product Description:

One of the key features of our POS Terminal is its SDK integration capabilities. Our device offers a free SDK for integration, making it easy for you to customize your POS system and integrate it with your existing systems.

The NFC capabilities of our POS Terminal are another highlight. With NFC support, you can easily accept contactless payments from customers using their mobile devices or other NFC-enabled payment methods. This ensures a fast and secure payment process, making it more convenient for your customers and reducing the risk of fraudulent transactions.

Our Android Smart POS Terminal also comes with a built-in MDM system. This MDM system ensures that your device is secure and can be easily managed from a central location. You can remotely manage and monitor your device, ensuring that it is always up-to-date and secure.

The POS Terminal comes with a 6-inch screen display, providing ample space for you to view transaction details and other important information. This display is clear and easy to read, ensuring that you can quickly and accurately complete transactions.

Our Android Smart POS Terminal is powered by a 3.8V 6400mAh battery. The battery life is impressive, ensuring that you can complete transactions all day without having to worry about running out of power. The 7.6V 3200mAh battery is also included as a backup, providing you with peace of mind in case the primary battery runs out of power.

Overall, our Android Smart POS Terminal is the perfect retail Pos System for your business needs. With its SDK integration capabilities, NFC support, MDM system, 6-inch screen display, and powerful battery, it is sure to make your point of sale transactions faster, easier, and more secure than ever before.
