- Connectivity: Wi-Fi, Bluetooth, 4G
- Processor: T606, Up To 2.0GHz
- Supported Languages: Multiple Languages
- NFC: Support NFC
- Suitable Users: Software Provider , Pos Hardware Wholesaler , End User
- Highlight: **NFC Supported POS Terminal,  
Dual Screen POS Terminal,  
6400mAh Battery Capacity POS Terminal**

## Product Description

### Product Description:

The Android POS system terminal machine is a cutting-edge solution designed to streamline operations and enhance efficiency in a variety of business settings such as restaurants, apparel stores, and jewelry shops. This advanced Android terminal POS machine offers a range of features and capabilities that cater to the needs of different users including software providers, POS hardware wholesalers, and end users.

The large, high-resolution screens provide clear visibility of transactions, order details, and product information, making it ideal for busy environments where speed and accuracy are crucial.

For businesses such as restaurants, the Android POS system offers seamless integration with various kitchen printers, enabling efficient order management and communication between front-of-house and back-of-house operations. The compatibility with 80mm printers ensures quick and reliable printing of receipts and order tickets, enhancing overall workflow efficiency.

With its cloud management platform for device management, the Android POS system enables remote monitoring and control of multiple terminals from a centralized location. This feature is particularly useful for software providers and POS hardware wholesalers who need to manage a large number of devices across different locations without the need for physical access.

Furthermore, the Android POS system comes with a free SDK that offers software providers the flexibility to customize and integrate their own applications with the POS system. This free SDK not only simplifies the integration process but also provides opportunities for developers to create tailored solutions that meet the specific requirements of different businesses.

Whether you are a software provider looking to enhance your POS offerings, a POS hardware wholesaler seeking a reliable and versatile solution for your clients, or an end user looking for a high-performance POS system for your business, the Android POS system is a versatile and powerful choice. Its dual-screen design, compatibility with 80mm printers, cloud management platform, and free SDK make it a comprehensive solution that can meet the diverse needs of businesses in various industries.
