Product Description:

The Android POS product is a versatile and innovative solution designed for businesses in need of a reliable and efficient point of sale system. With a large 6.5-inch display, this desktop Android POS terminal provides users with a clear and user-friendly interface to streamline transactions and enhance overall customer experience.

One of the standout features of this Android POS terminal is its support for NFC technology. This enables businesses to accept contactless payments, making transactions faster and more convenient for both customers and staff. Whether you are a software provider, POS hardware wholesaler, or an end user, this Android POS product is suitable for a wide range of businesses looking to modernize their payment systems.

In addition to its NFC capabilities, this terminal Android POS supports multiple languages, catering to diverse customer bases and ensuring clear communication during transactions. This feature is particularly beneficial for businesses with international clientele or those operating in multilingual environments.

When it comes to connectivity, the Android POS product offers a range of options to meet the needs of modern businesses. Equipped with Wi-Fi, Bluetooth, and 4G connectivity, users can stay connected to their network and process transactions efficiently, whether in a fixed location or on the go.

For businesses looking to elevate their point of sale experience, the dual screen POS terminal Android is a game-changer. With its large display, NFC support, multilingual capabilities, and versatile connectivity options, this Android POS product is a comprehensive solution for businesses of all sizes.

Applications:

HANBU Android POS (Model: HB-P65) is a versatile and reliable point-of-sale solution designed and manufactured in China. With certifications such as CE, FCC, and RoHS, this Android POS terminal is suitable for various application occasions and scenarios. Whether you are in the catering industry, retail store business, transportation sector, or lottery industry, the HANBU Android POS is a perfect fit. It can be used in a variety of settings such as cafes, supermarkets, convenience stores, food trucks, and more.

The Android POS terminal supports multiple languages, making it convenient for users from different regions to operate. It also comes with NFC support, enabling contactless payments for a seamless transaction experience.

Software providers, POS hardware wholesalers, and end-users can benefit from the HANBU Android POS due to its advanced features and functionalities. The connectivity options including Wi-Fi, Bluetooth, and 4G ensure smooth communication and data transfer.

With a minimum order quantity of 1 and a supply ability of 20000 pcs per month, the HANBU Android POS offers flexibility for both small and large-scale businesses. The pricing is negotiable, and the packaging details include 1 piece in one carton for easy shipment.

Delivery time for samples is 3-7 working days, while bulk orders can be discussed based on requirements. Payment terms accepted are T/T and L/C, providing convenient options for financial transactions.

In conclusion, the HANBU Android POS is a cutting-edge solution for businesses looking for an efficient and user-friendly point-of-sale system. Its compatibility with various industries, support for multiple languages, and connectivity options make it a top choice for those seeking an Android supermarket POS terminal, Hanbu HB-P65 Android POS systems terminal machine, or dual-screen POS terminal Android.
