Product Description:

The Android POS product is a versatile and advanced solution designed to cater to the needs of Software Providers, POS Hardware Wholesalers, and End Users. With its robust features and connectivity options, this terminal Android POS device is a game-changer in the industry.

Connectivity is a key highlight of this Android 13 POS terminal, offering Wi-Fi, Bluetooth, and 4G capabilities. This ensures seamless communication and data transfer, making it ideal for various settings such as restaurants, apparel stores, and jewelry shops.

The front camera of the Android supermarket POS terminal boasts an impressive 500 million pixels, enabling users to capture high-quality images and videos for various purposes, including scanning barcodes and processing transactions efficiently.

Powered by the SC9863 processor, this Android POS device delivers fast and reliable performance, allowing users to multitask and handle complex operations with ease. Whether you are a Software Provider looking to integrate this device into your solutions or a POS Hardware Wholesaler seeking a cutting-edge product for your clients, this Android 13 POS terminal is the perfect choice.

For End Users, this Android supermarket POS terminal offers a user-friendly interface and intuitive features that enhance the overall shopping experience. From managing inventory and processing payments to generating detailed reports, this device is equipped to meet the demands of modern businesses.

Whether you are a restaurant owner looking to streamline your operations, an apparel store manager in need of a reliable POS solution, or a jewelry shop owner seeking a versatile and efficient device, the Android POS product is tailored to meet your specific requirements.

Applications:

HANBU Android POS (Model: HB-P55) is a versatile and efficient point of sale solution that is suitable for a wide range of application occasions and scenarios. With its advanced features and specifications, this desktop Android POS terminal is ideal for various industries and businesses.

One key application scenario for the HANBU Android POS is in the retail sector. Retailers can use this device for seamless and secure transactions at the point of sale. The flat capacitive touch screen and 58mm printer make it easy to process payments and print receipts quickly and efficiently.

Another potential use case for the HB-P55 Android POS is in the hospitality industry. Restaurants, cafes, and bars can benefit from its user-friendly interface and high performance. The front camera with 500 Million Pixels can be utilized for scanning barcodes or QR codes, enhancing the ordering and payment process.

Additionally, the HANBU Android POS is well-suited for sports betting establishments. The device's reliability and speed make it an excellent choice for handling transactions and bets efficiently. The Android app store provides access to various apps that can be customized to meet the specific needs of sports betting operators.

Whether you are a software provider, POS hardware wholesaler, or end user, the HANBU Android POS offers a reliable and cost-effective solution for your business needs. Its compact design, 5.5-inch screen size, and certification (CE, FCC, RoHS) make it a versatile option for different industries.

With a minimum order quantity of 1 and flexible payment terms (T/T, L/C), the HANBU Android POS is accessible to businesses of all sizes. The packaging details ensure safe delivery, with 1 piece in one carton. The delivery time for samples is 3-7 working days, while bulk orders can be discussed based on requirements.

Don't miss out on the opportunity to enhance your business operations with the HANBU Android POS. Contact us today to discuss pricing and place your order. With a supply ability of 20,000 pcs/month, we are ready to meet your POS needs efficiently and effectively.
