- Highlight: **2*Nano SIM Card Mobile POS**, **3100mAh Mobile POS, 7.7V Mobile POS**

Advanced Device Management

Product Description:

Point of Sale (PoS) terminals are key elements in payment systems for retailers or restaurants in Smart Cities. These battery-powered terminals have small form factors and can integrate functions such as a display, a card reader, a keypad and a printer. Terminals usually include wireless communication to a back-office server or a main stationary ePOS terminal. They also support magnetic, smart and contactless payment cards.

Our solutions power secure, on-the-go mobile payment terminals, providing end users the ease-of-use of contact and contactless payment. Our security features help the designer to get the necessary PCI PTS PIN entry device (PED) and EMVCo certifications.
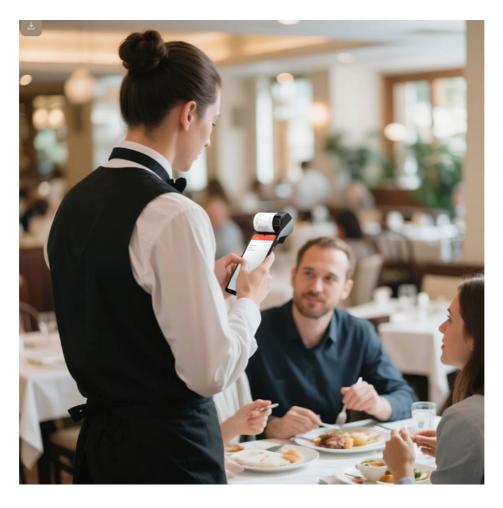

Features:

Product Name: Mobile POS
Dimensions: 238*81.8*16.8 Mm
Memory: 3GB+32GB
Weight: 419g (battery Incl.)
