Product Description:

V3, is a POS system that uses a smartphone or tablet to act as a register and accept payments on the go. A mobile POS accepts credit cards and contactless payments, giving even the smallest restaurants or catering side hustles options when it comes to transaction methods.

What sets a mobile POS apart from a stationary POS system is the portability of the hardware. POS systems usually have a terminal, cash drawer and receipt printer. The hardware has a fixed location within the restaurant or store. With a mobile POS, the terminal is portable. You can take it with you to a trade show or to other locations, such as catering gigs.
