

7.7V 3100mAh Battery Mobile POS with Optional NFC and Qualcomm Hexa-core CPU

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Sunmi
- Certification: CE , FCC , RoHs , MSDS , BIS
- Model Number: V3
- Minimum Order Quantity: 1
- Price: to be negotiated
- Packaging Details: 1pc/box,5pcs /carton
- Delivery Time: 4 - 7 working days
- Payment Terms: T/T
- Supply Ability: 15000 pieces per month

Product Specification

- Print Speed: Fast Print Speed Reach 70mm/s
- SIM Card Slot: 2*Nano SIM Card
- GPS: GPS/Glonass/Beidou/ Galileo
- Battery: 7.7V 3100mAh
- Warranty: 1 Year
- Printer: 58mm Thermal Printer
- Cpu: Qualcomm Hexa-core
- Display Screen: 6.75
- Highlight: **Qualcomm Hexa Core CPU Mobile POS, 3100mAh Mobile POS, 7.7V Mobile POS**

Product Description

Product Description:

V3 is an indispensable tool in the modern restaurant environment, consisting of both hardware (the terminal) and software that work together to streamline daily operations and enhance customer service. Here's how a POS system supports your business:

Sales Transactions: The primary function of a POS terminal is to facilitate sales transactions. Staff members input orders and process payments—including cash, credit cards, and increasingly popular contactless payments—efficiently. This system ensures quick service and generates receipts immediately, keeping the payment process smooth for both staff and customers.

Order Management: Beyond processing payments, POS terminals excel in order management. They seamlessly send customer orders directly to the kitchen, minimizing order errors and expediting the food preparation process. The system also keeps track of order statuses, ensuring that every dish reaches the table hot and fresh.

Menu Management: A POS system makes adjusting menu prices and monitoring inventory levels straightforward. This capability allows for quick menu updates, accommodating changes in ingredient availability or pricing without hassle.

Customer Management: Advanced POS systems do more than handle transactions. They also manage customer relationships. By storing customer information, POS systems enable restaurants to tailor services and promotions to individual preferences and dining histories, fostering loyalty and enhancing the customer experience.

Reporting and Analytics: A POS terminal is also a powerful tool for backend analytics. It compiles detailed reports on sales trends, customer behaviors, and more, providing valuable insights that aid in informed decision-making and strategic planning.

Through these functionalities, POS terminals serve as a critical component in effectively managing day-to-day restaurant operations, ensuring customer satisfaction and operational efficiency.

Features:

Product Name: Mobile POS

Display Screen: 6.75"

Battery: 7.7V 3100mAh

Operation System: SUNMI OS (Based On Android 13 64bit)

Printer: 58mm Thermal Printer

Memory: 3GB+32GB

Technical Parameters:

Warranty	1 Year
Print speed	Fast Print Speed Reach 70mm/s
Port	USB Type-C OTG
Weight	419g (battery Incl.)
Printer	58mm Thermal Printer
NFC	Optional
Dimensions	238*81.8*16.8 Mm
GPS	GPS/Glonass/Beidou/ Galileo
Operation system	SUNMI OS (Based On Android 13 64bit)
SIM Card Slot	2*Nano SIM Card

Applications:

Sunmi V3, a versatile mobile POS device, is ideal for a wide range of Product Application Occasions and Scenarios due to its innovative features and specifications. As a prominent brand from China, Sunmi ensures that the V3 model meets the highest standards, holding certifications such as CE, FCC, RoHs, MSDS, and BIS.

The Sunmi V3 is designed to handle POS transactions efficiently, making it perfect for retail businesses, food outlets, and service providers. Its compact size and portability allow for seamless use in various settings, whether it's a bustling retail store, a busy restaurant, or a fast-paced event.

With a minimum order quantity of just 1 unit and competitive pricing that can be negotiated, the Sunmi V3 offers flexibility for businesses of all sizes. The packaging details of 1pc/box and 5pcs/carton ensure convenience in storage and transportation, while the quick delivery time of 4 - 7 working days means businesses can swiftly integrate the device into their operations.

Businesses can enjoy the convenience of T/T payment terms and a robust supply ability of 15000 pieces per month, ensuring a smooth procurement process. The Sunmi V3 features a 58mm thermal printer for generating receipts on the go, along with GPS/Glonass/Beidou/Galileo capabilities for precise location tracking.

Equipped with a powerful 7.7V 3100mAh battery, the Sunmi V3 offers extended usage time without frequent recharging. The compact dimensions of 238*81.8*16.8 mm make it easy to handle, while the 1-year warranty provides peace of mind for businesses.

In conclusion, the Sunmi V3 is a cutting-edge POS Android handheld device that caters to a diverse range of Product Application Occasions and Scenarios. Its advanced features, combined with the brand's reliability and quality assurance, make it a top choice for businesses looking to streamline their POS operations.
