Product Description:

The Mobile POS product is a cutting-edge solution designed to meet the needs of modern businesses looking for a versatile and efficient point of sale system. Operating on the powerful SUNMI OS, which is based on Android 14 64bit, this mobile POS offers a seamless and user-friendly experience for businesses of all sizes.

Equipped with advanced GPS capabilities including GPS, Glonass, Beidou, and Galileo, the Mobile POS ensures accurate location tracking and navigation, making it ideal for businesses that require on-the-go operations or delivery services.

Powered by a Qualcomm Hexa-core processor, this mobile POS delivers high performance and efficiency, allowing for smooth and speedy transactions. Whether you are processing payments, managing inventory, or running reports, the Mobile POS can handle it all with ease.

The Mobile POS features a large 6.75 inch display screen, providing ample space for easy navigation and enhanced visibility. The crystal-clear display ensures that transactions and information are easily readable, enhancing the overall user experience.

For added convenience and flexibility, the Mobile POS comes with an optional scanner feature, allowing businesses to easily scan barcodes, QR codes, or other product information. This feature is especially useful for businesses in retail, hospitality, or logistics industries.

With its compact and portable design, the Mobile POS is the perfect solution for businesses looking for a PCI Compliant POS system that is both versatile and reliable. Whether you are a small boutique, a salon booking service, or a large retail chain, this All-in-One POS system has you covered.

Streamline your operations, improve customer service, and boost sales with the Mobile POS. Its powerful features, sleek design, and user-friendly interface make it a must-have tool for any business looking to stay ahead in today's fast-paced market.
