Lightning-Fast Order Processing: The hexa-core processor and SUNMI OS 4.0 handle split-second order entry and payment processing. Quickly scan QR codes for payments or loyalty programs.

Kitchen & Receipt Printing Instantly: Integrated 70mm/s thermal printer means sending orders to the kitchen or printing customer receipts takes seconds – right at the table or counter.

Reliable Connectivity: Dual-band Wi-Fi ensures stable connections for cloud-based POS systems, even in busy venues. Dual SIM slots provide crucial cellular backup.

Secure & Compact: Process payments securely with PSAM support and fingerprint login. Its compact size (246x231x73mm) fits easily on crowded counters or in server hands.

All-Day Power: The removable battery keeps you going through long shifts. Optional cradle adds charging and USB/RJ11/RJ45 ports for fixed stations.

Application:

Pop-Up Stores & Temporary Retail Events:

Its portability (built-in battery, compact form) makes it ideal for markets, festivals, or seasonal shops. Combines payment acceptance, inventory lookup, and receipt printing in one device without fixed infrastructure.

Queue Busting & Line Management:

Staff equipped with V3Mix units can move through queues in busy stores (e.g., apparel, electronics). They scan items, process payments instantly on the spot, issue e-receipts or print mini-receipts, significantly reducing congestion at main counters.
