offers efficient payment processing, accepting multiple payment methods, including cards and mobile payments. It features real-time space monitoring, automated ticketing, and user-friendly interfaces.

Government Fiscal
It offers detailed reporting and analytics for budget management, integrates with existing financial systems, and enhances transparency.

Details Page Description:

In the dynamic world of modern business, having a reliable and feature - rich Point - of - Sale (POS) system is not just an advantage but a necessity. Introducing our Smart Handheld POS Terminal, a cutting - edge device designed to transform the way you handle transactions, manage inventory, and interact with customers.

1. Operating System and GMS Certification

Powered by Android 14 and GMS (Google Mobile Services) certified, this POS terminal offers a seamless and secure operating environment. With GMS certification, you can enjoy full access to Google apps such as Google Play Store, Gmail, and Google Maps. This means you can easily download and integrate business - critical apps to customize the device according to your specific needs. Whether it's a loyalty program app, a sales analytics tool, or a customer relationship management (CRM) system, the Android 14 platform provides the flexibility to enhance your business operations.

2. Built - in 80mm Thermal Printer

One of the standout features of this POS terminal is its 80mm built - in thermal printer with an adjustable print width. The printing built - in sliding module allows you to adapt the print width, making it highly flexible for various commercial applications. It can handle not only standard receipt printing but also label printing, QR code printing, and even image printing. Whether you're in a retail store printing product labels, a restaurant providing detailed receipts, or a logistics company generating shipping labels, this printer has you covered. The ability to switch between 58mm and 80mm print widths (with compatible paper rolls) ensures that you can meet different business requirements without the need for additional hardware.

3. High - Performance Cameras and Scanning

Equipped with a 5MP rear camera, this POS terminal enables swift QR code scanning, which is essential for modern payment methods and inventory management. The rear camera supports fill - in light and auto - focus, ensuring accurate scanning even in less - than - ideal lighting conditions. Additionally, the device can be paired with a 2.0MP front - facing camera (optional) and a 2D barcode scanner (optional), unlocking more functions such as customer identification, selfie - based loyalty program sign - ups, and advanced inventory tracking. Whether you're scanning product barcodes for quick checkout or QR codes for mobile payments, the scanning capabilities of this POS terminal are designed to streamline your operations.

4. Powerful Performance and Memory

Under the hood, the POS terminal boasts an octa - core processor (2A75 + 6A55) with a maximum frequency of 2.0GHz. This powerful CPU ensures that the device can handle multiple tasks simultaneously with ease. Whether you're running a point - of - sale application, managing inventory in real - time, and accessing cloud - based business tools all at once, the processor delivers a smooth and responsive experience. The device also offers flexible memory options - 3GB + 32GB or 4GB + 64GB - allowing you to choose the configuration that best suits your business size and data storage needs. You can store a large number of transaction records, product databases, and business apps without worrying about running out of space.

5. Long - Lasting Battery and Connectivity

The 6400mAh removable battery provides up to 8 hours of working time, ensuring that the device can keep up with the demands of a busy business day. Whether you're operating in a retail store, a food truck, or a delivery service, the long - lasting battery eliminates the need for frequent recharging, allowing you to focus on serving your customers. In terms of connectivity, the POS terminal offers a comprehensive set of options. It supports 4G SIM cards (dual), 5.0 Bluetooth, 2.4G/5G WiFi, and NFC. The 4G connectivity ensures that you can process transactions even in areas with limited WiFi coverage. Bluetooth and WiFi enable seamless integration with other devices such as printers, scanners, or your mobile phone. NFC support allows for contactless payments, providing a convenient and fast payment option for your customers.

Why Choose the P65 for Mobility?

The P65 is the ultimate mobile business partner. Its combination of reliable 4G connectivity, exceptional battery life, built-in receipt printing, and full payment acceptance (including NFC) empowers delivery drivers, market vendors, food truck operators, and service technicians to process transactions professionally and efficiently, anywhere, anytime. Packed with features and ready to use, it delivers outstanding value for growing mobile businesses. Ditch the clipboard and upgrade to a complete mobile POS solution!
