offers efficient payment processing, accepting multiple payment methods, including cards and mobile payments. It features real-time space monitoring, automated ticketing, and user-friendly interfaces.

**Government Fiscal**  
It offers detailed reporting and analytics for budget management, integrates with existing financial systems, and enhances transparency.

#### 1. Android 14 and GMS Certification: A World of Apps at Your Fingertips

At the heart of this POS terminal is the Android 14 operating system, which is GMS certified. This certification is a mark of quality, ensuring that the device is fully compatible with a vast array of Google apps. From the Google Play Store, you can download essential business applications such as accounting software, inventory management tools, and customer engagement apps. The Android 14 platform also offers enhanced security features, protecting your business data and customer information from potential threats. Whether you're a small boutique or a large-scale enterprise, the ability to customize your POS system with the right apps can significantly improve your business processes.

#### 2. 80mm Built-in Thermal Printer: Flexible and Efficient Printing

The 80mm built-in thermal printer is a game-changer for businesses that require on-demand printing. With its adjustable print width, it can handle various printing tasks with ease. Need to print a standard 58mm receipt for a customer? No problem. Want to create an 80mm label for a product in your warehouse? It can do that too. The printer is also capable of QR code printing and image printing, opening up new possibilities for marketing and customer engagement. For example, you can print QR codes that link to your business's loyalty program or promotional offers, or include your company logo on receipts for brand recognition. The high-speed printing ensures that your customers don't have to wait long, improving overall customer satisfaction.

#### 3. High-Quality Cameras and Scanning Capabilities

The 5MP rear camera is a powerful tool for modern businesses. It enables fast and accurate QR code scanning, which is essential for mobile payments, inventory management, and access to digital coupons or loyalty programs. The camera's fill-in light and auto-focus features ensure that it can scan codes in any lighting condition, whether it's a brightly lit retail store or a dimly lit warehouse. Additionally, the option to add a 2.0MP front-facing camera and a 2D barcode scanner provides even more functionality. The front camera can be used for customer identification, taking photos for loyalty program profiles, or even for video-based customer support. The 2D barcode scanner (optional) allows for quick and accurate scanning of a wide range of barcodes, making inventory management and product checkout a breeze.

#### 4. Powerful Performance and Memory Options

Powered by an octa-core processor (2A75 + 6A55) with a maximum frequency of 2.0GHz, this POS terminal can handle the most demanding business tasks. Whether you're running multiple applications simultaneously, processing a high volume of transactions, or managing a large inventory database, the processor ensures smooth and responsive performance. The device also offers two memory configurations - 3GB + 32GB and 4GB + 64GB - allowing you to choose the one that best fits your business requirements. With ample memory, you can store all your business-critical data, including transaction records, customer information, and product databases, without worrying about slowdowns or storage limitations.

#### 5. Long-Lasting Battery and Comprehensive Connectivity

The 6400mAh removable battery provides up to 8 hours of continuous working time, ensuring that the POS terminal can keep up with your business throughout the day. This is especially important for businesses that are on the move, such as food trucks, delivery services, and pop-up shops. When it comes to connectivity, this device leaves nothing to be desired. It supports two 4G SIM cards, ensuring that you have a reliable and fast data connection even in areas with poor WiFi coverage. Bluetooth 5.0 allows for seamless pairing with other devices such as printers, scanners, or mobile phones. The dual-band WiFi (2.4G/5G) provides flexible and high-speed wireless connectivity, and NFC support enables contactless payments, making the checkout process quick and convenient for your customers.

## 6. Diverse Application Scenarios

This Advanced Handheld POS is designed to be adaptable to a wide range of business scenarios:

**Retail Environments:** In a department store, it can be used for fast checkout, inventory tracking, and price checking. The ability to print labels and receipts on - the - go streamlines operations.

**Food and Beverage Industry:** Restaurants, cafes, and food trucks can use it for taking orders, processing payments, and printing receipts. The long battery life ensures it can handle busy lunch and dinner rushes.

**Logistics and Warehousing:** For inventory management, shipping label printing, and package scanning, this POS terminal is an invaluable tool. The optional 2D barcode scanner can speed up the process of tracking and managing stock.

**Lottery and Gaming:** It simplifies the sale of lottery tickets, with the ability to print tickets quickly and process payments securely.

**Government and Fiscal Services:** For handling tax payments, license fees, and other fiscal transactions, the device provides a secure and efficient platform.

In summary, our Advanced Handheld POS is a powerful and versatile tool that can transform the way your business operates. With its advanced features such as Android 14, an 80mm thermal printer, high - quality cameras, and comprehensive connectivity, it provides a seamless and efficient point - of - sale experience. Whether you're looking to upgrade your existing POS system or implement a new one, this device is designed to meet the needs of modern businesses. Invest in our Advanced Handheld POS today and unlock the potential for greater efficiency, productivity, and customer satisfaction in your business.

### Why Choose the P65 for Mobility?

The P65 is the ultimate mobile business partner. Its combination of reliable 4G connectivity, exceptional battery life, built-in receipt printing, and full payment acceptance (including NFC) empowers delivery drivers, market vendors, food truck operators, and service technicians to process transactions professionally and efficiently, anywhere, anytime. Packed with features and ready to use, it delivers outstanding value for growing mobile businesses. Ditch the clipboard and upgrade to a complete mobile POS solution!
