

SUNMI CPad PAY 11" Smart Commercial Pad – Integrated Payment Solution with FHD Display, Powerful Performance & Multi-Scenario Adaptability

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Sunmi
- Certification: ISO9001,ROHS,CE
- Model Number: CPad Pay
- Minimum Order Quantity: 1
- Delivery Time: 5-7 days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 50000 PCS/months

Product Specification

- Product Name: Smart Commercial Pad
- Display: 11"
- Processor: Qualcomm Octa-Core CPU (up To 2.4GHz)
- Memory: 4GB RAM + 64GB ROM
- Operating System: Android 13
- Certifications: Certifications
- Weight: 586g
- Highlight: **SUNMI CPad PAY 11 commercial pad , smart POS with FHD display, integrated payment solution POS**

Product Description

SUNMI CPad PAY: All-in-One Smart Commercial Pad for Seamless Payments & Business Operations

All-in-One Payment Processing

Key Features: Supports on-screen NFC, QR codes, magnetic stripe cards (bi-directional), IC cards, and global payment networks (Visa payWave, MasterCard PayPass, American Express)

Scenarios: Retail checkouts where customers use diverse payment methods. For example, a clothing store during sales can handle a contactless Visa payment, a WeChat QR code scan, and a magnetic stripe card swipe—all on one device, eliminating the need for multiple terminals.

OS	SUNMI OS 4.0
Buttons	1*Power button (Fingerprint ID) 1*Volume button 1*Function button
eSIM	Supported (Optional)
Cellular	4G/3G/2G
Wi-Fi	5GHz/2.4GHz IEEE 802.11 a/b/g/n/ac
Hyper Wi-Fi	Supported (Optional)
Bluetooth	Bluetooth 5.1, Support BLE

Description:

In today's fast-paced business world, efficiency and security in transactions are non-negotiable. The SUNMI CPad PAY 11" Smart Commercial Pad redefines what a commercial device can do, merging seamless payment processing with powerful business tools into a single, sleek solution. Whether you run a bustling restaurant, a busy retail store, or a self-service banking kiosk, this all-in-one pad is engineered to elevate operations, reduce wait times, and enhance customer satisfaction.

At first glance, the 11" WUXGA display (1920×1200 resolution) stands out as a hub of information. With 450 nits of brightness, it remains visible even in well-lit environments, ensuring customers and staff can easily view order details, payment options, or promotional content. The industrial-grade TDDI chip enhances touch responsiveness, while the anti-fingerprint nano coating keeps the screen clean and clear—critical for high-traffic settings where the device is used hundreds of times daily.

Beneath the surface, the CPad PAY is a powerhouse. Equipped with a Qualcomm Octa-Core CPU (up to 2.4GHz) and up to 8GB RAM + 128GB ROM, it handles multitasking effortlessly. Run payment software, inventory management tools, and customer relationship apps simultaneously without lag—perfect for peak hours in restaurants during lunch rushes or retail stores during sales events. Need more storage? The expandable Micro SD slot supports up to 512GB, so you can store transaction logs, receipts, and software updates without worry.

What truly sets the CPad PAY apart is its integrated payment ecosystem. It eliminates the need for separate card readers,

NFC terminals, or QR scanners by packing all these features into one device. Accept on-screen NFC payments (compatible with Visa payWave, MasterCard PayPass, and more), scan QR codes for mobile wallet transactions, process magnetic stripe cards (bi-directionally, supporting 1/2/3 tracks), and read IC cards—all while ensuring compliance with global standards like PCI PTS 6.X and EMV . This not only streamlines checkout but also reduces the risk of human error and equipment mishaps.

Security is woven into every component. SUNMI OS 4.0, built on Android 13, is specifically designed for payment environments, with rigorous PCI and EMV certifications to protect sensitive data . The SUNMI RKI system allows secure key injection and updates, lowering operational costs, while the TMS (Terminal Management System) deployed on a private cloud lets you manage devices remotely—ensuring software is up-to-date and transactions are monitored in real time .

Versatility is another strength. With three versions (Mobile, Countertop Ready, and Secondary Display) and over 10 accessories, the CPad PAY adapts to any scenario. The Mobile Version, at just 586g and 10.95mm thin, comes with optional shoulder straps and protective cases, making it ideal for tableside ordering or pop-up events . The Countertop Ready Version pairs with desktop bases (horizontal/vertical installation) and printing bases, turning it into a fixed checkout hub for retail 1-60. The Secondary Display Version integrates with T3 PRO/T3 Family/D3 PRO devices, enhancing payment experiences with dual-screen interactions—showcasing promotions on one screen while processing payments on the other .

From restaurant ordering to self-banking, the CPad PAY excels. In dining settings, staff can take orders directly on the pad, send them to the kitchen instantly, and process payments tableside—cutting down on table turnover time. In retail, it speeds up checkout with quick barcode scanning (via optional external scanners) and supports loyalty program integrations. For self-service banking, its secure bi-directional card reading and fingerprint recognition (optional) ensure safe, user-friendly transactions .

Durability matches its performance. Operating seamlessly in temperatures from -10°C to 50°C, it withstands the rigors of busy environments. The Mobile Version even offers IPX2 protection, guarding against minor splashes .

Investing in the SUNMI CPad PAY means investing in a device that grows with your business. Its robust design, multi-payment support, and adaptability across industries make it more than a payment pad—it's a cornerstone of efficient, secure, and customer-centric operations. Upgrade your business today and experience the future of commercial technology.

Product Packaging:

Our Mobile POS product is carefully packaged to ensure its safety during transit. Each device is securely wrapped in protective material to prevent any damages. The packaging is compact and lightweight, making it easy to transport and store.

Shipping:

Once you place your order, our team will process it quickly to ensure prompt shipping. We partner with reliable courier services to deliver your Mobile POS product to your doorstep in a timely manner. You will receive a tracking number so you can monitor the status of your shipment.
