- Memory: 4GB RAM + 64GB ROM
- Version: Mobile (Model T670A)
- Design: Ultra-Thin
- Weight: 586g

## Product Description

SUNMI CPad PAY 11" Mobile Version: Portable Payment & Service Hub for On-the-Go Businesses

Tablesides Ordering & Payment (Restaurant Use)

Key Features: 11" FHD display for menu viewing, integrated payment processing, and seamless order transmission to kitchens.

Scenarios: Fine dining restaurants where servers take orders directly at the table. The CPad PAY displays high-resolution menu images, allows customers to modify orders in real time, and processes payments (e.g., splitting the bill via NFC) before the meal ends, reducing table turnover time.

Keywords	Mobile Version Commercial Pad

Optional Accessories	Protective Case (with Wrist Strap), Shoulder Strap, External Fingerprint Module
Protection	IPX2
Cameras	5MP Front + 13MP Rear (AF)
Positioning	GPS/Glonass/Beidou/Galileo
Design	Lightweight
Battery	Removable 3.87V/8000mAh

### Description:

For businesses that operate beyond the confines of a fixed counter—food trucks, pop-up shops, delivery services, or tablesides dining—the SUNMI CPad PAY 11" Mobile Version is a game-changer. Engineered for portability without compromising on power, this ultra-thin (10.95mm), lightweight (586g) device lets you take seamless payments and business tools wherever your customers are.

Mobility starts with the battery, and the Mobile Version doesn't disappoint. Its removable 8000mAh lithium polymer battery delivers all-day power, even during peak hours. Whether you're processing orders at a weekend market or taking payments for delivery, you won't be tethered to a power outlet. And if you need to swap batteries mid-shift, the quick-release design ensures minimal downtime.

Staying connected on the move is effortless. With 4G/3G/2G cellular support, you're never out of range—critical for remote locations where Wi-Fi is spotty. When Wi-Fi is available, the dual-band (5GHz/2.4GHz) IEEE 802.11 a/b/g/n/ac Wi-Fi ensures fast, stable connections for syncing transactions or updating inventory. Bluetooth 5.1 with BLE support lets you pair with wireless printers or barcode scanners, further expanding your on-the-go capabilities.

The 11" WUXGA display (1920×1200) remains a standout feature, even in mobile use. Its 450 nits brightness cuts through sunlight, making it easy for customers to review orders or sign for payments outdoors. The anti-fingerprint coating reduces smudges, keeping the screen professional-looking all day, while the industrial-grade TDDI chip ensures responsive touch—even with gloves on, a must for food service.

Performance is uncompromised. Powered by a Qualcomm Octa-Core CPU (up to 2.4GHz) and 4GB/8GB RAM, the Mobile Version handles multitasking with ease: process a payment, check stock levels, and send a receipt via email—all at once. The 64GB/128GB ROM (expandable to 512GB) stores transaction records and apps, so you're never caught short.

Security and compliance travel with you, too. The Mobile Version carries the same rigorous certifications as other CPad PAY models: PCI PTS 6.X, EMV L1 & L2, and Visa payWave approval, ensuring every transaction—whether via NFC, QR code, or magnetic stripe—is encrypted and secure. The optional external fingerprint module adds an extra layer of protection for sensitive operations.

Durability is built in. With IPX2 protection, it shrugs off minor splashes—perfect for food trucks or rainy outdoor events. The optional protective case, complete with a wrist strap, prevents drops and scratches, while the shoulder strap keeps it hands-free when you're moving between customers.

From food trucks processing contactless payments to hotel staff checking in guests with mobile keycards, the SUNMI CPad PAY 11" Mobile Version empowers businesses to break free from fixed locations. It's not just a portable payment device—it's a complete mobile business hub that keeps you connected, efficient, and secure, no matter where work takes you.

#### **Product Packaging:**

Our Mobile POS product is carefully packaged to ensure its safety during transit. Each device is securely wrapped in protective material to prevent any damages. The packaging is compact and lightweight, making it easy to transport and store.

#### **Shipping:**

Once you place your order, our team will process it quickly to ensure prompt shipping. We partner with reliable courier services to deliver your Mobile POS product to your doorstep in a timely manner. You will receive a tracking number so you can monitor the status of your shipment.
