# Android Pos Sim Card NFC GMS 4G Supermarket Equipment Sistemas Pos Payment Machine Restaurant Pos
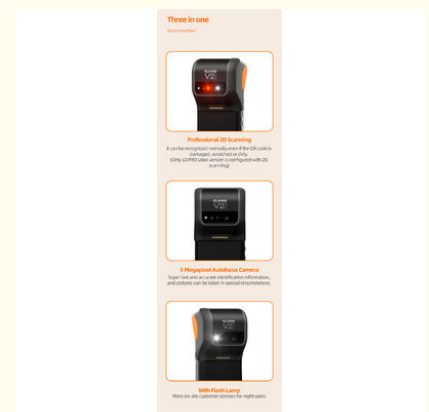

Our Product Introduction

## Basic Information

- Place of Origin:        China
- Brand Name:        Sunmi
- Certification:        ISO9001,ROHS,CE
- Model Number:        V2 PRO
- Minimum Order Quantity:        1
- Delivery Time:        5-7 days
- Payment Terms:        L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability:        50000 PCS/months

### what can I do?

In addition to receive takeout orders, mobile ordering, and scan the QR code to checkout, it can also perform functions such as inventory management and data reporting.

stock management
report analysis
cashier management
membership management
queueing system
marketing management

## Product Specification

- OS:        SUNMI OS
- Processor:        Cortex-A53 Quad-core 1.4GHz (high Efficiency For Multi-app Running)
- Memory:        2GB RAM + 16GB ROM
- Display:        5.99" HD+ Screen
- Printer:        Built-in 58mm Thermal Printer
- Barcode Recognition:        1D/2D Barcode Recognition
- Scanner:        1D Barcode Scan Engine (scans Smoothly Even For Slightly Worn Barcodes)
- NFC Function:        Supports Type A&B Cards, Mifare Cards, Felica Cards; Compliant With ISO/ICE 14443 And ISO15693
- Highlight:        **Android POS machine with NFC**, **4G POS payment system for restaurants**, **Supermarket POS equipment with GMS**

Supports BLE

## Product Description

The SUNMI V2 PRO Global Version Handheld POS is built for businesses operating in international markets – from multinational retailers to cross-border e-commerce sellers, and global hospitality chains. Unlike regional versions, it combines the Standard Version's core POS functions with the Label Version's dual printing capabilities, plus critical global optimizations: multi-language support (20+ languages), global 4G bands (works in 190+ countries), universal voltage, and compliance with regional standards (CE, FCC, EMV). Whether you're processing payments in a Parisian café, printing CE-compliant labels in a German warehouse, or tracking shipments in a Brazilian fulfillment center, the Global Version adapts to local needs. It's also climate-resistant (works in -10 ~50 ) and comes with global after-sales support – making it the most versatile V2 PRO model for international businesses.

## Product Application Scenarios

Multinational Retail Chains (e.g., Clothing Stores in Europe & Asia): Staff can switch the interface between English (UK), French (France), and Mandarin (China) with one tap. The 2D scanner reads global barcode standards (UPC for US, EAN for Europe), and the NFC function supports EMV contactless payments (common in Europe). For inventory, print CE-compliant labels in Germany or CCC labels in China – no need for separate devices per region.
Cross-Border E-Commerce Sellers (e.g., Amazon FBA in US & Japan): The Global Version prints region-specific shipping labels (USPS for US, Japan Post for Japan) and scans international tracking codes (e.g., DHL Global Forwarding). Global 4G lets you manage inventory in a US warehouse while traveling in Japan, and the universal adapter works with both US (Type A) and Japan (Type A/B) plugs.

International Hospitality Chains (e.g., Hotels in Dubai & Thailand): In Dubai, use the Arabic interface (right-to-left display) to take orders at a hotel restaurant, and process payments via EMV chips (mandatory in the UAE). In Thailand, the anti-humidity coating protects the device from the country's humid climate, and the 2D scanner reads Thai QR codes for mobile payments (PromptPay). The temperature-resistant battery works in Dubai's 45 summer heat and Thailand's 35 humidity.

Remote Humanitarian Organizations (e.g., Africa & South America): The Global Version's solar charging pad accessory (optional) works in areas with no electricity – critical for aid distribution. It prints labels for food packages (with local language instructions) and uses GPS to track delivery routes in remote regions like the Amazon. Compliance with local standards (e.g., Nigerian NCC, South African ICASA) ensures it's legal to use in these countries.

## Product Advantages

No Regional Limitations: Global 4G bands (850/900/1800/1900MHz) and universal voltage (100~240V) mean you can use the device in 190+ countries – no need to buy a new POS for each region. The included global plug adapter set (Type A/B/C/G) works with outlets in the US, Europe, UK, and Australia.

Multi-Language & Right-to-Left Support: 20+ pre-installed languages (English, Spanish, French, Arabic, Portuguese, Mandarin, etc.) include right-to-left displays for Arabic and Hebrew – essential for businesses in the Middle East. Staff and customers can interact in their native language, improving user experience.

Global Payment Security: Complies with EMV (contactless payments), PCI DSS (data security), and regional standards (e.g., SEPA for European payments, CNP for Latin American card-not-present transactions). This ensures secure transactions anywhere, reducing the risk of fraud or fines.

Climate Adaptability: The temperature-resistant battery (-10 ~50 ) and anti-humidity coating work in extreme climates – from the freezing winters of Canada to the hot, humid summers of India. It won't malfunction due to weather, making it reliable for outdoor or remote use.

Regional Compliance Made Easy: Pre-built label templates and compliance data (CE, FDA, ANVISA) eliminate the guesswork of meeting local regulations. For example, print EU CE labels for electronics or US FDA labels for food – the device ensures labels meet size, font, and content requirements.

## Product Features

Global Barcode Scanning: The 2D scan engine reads all global barcode standards (UPC, EAN, QR Code, Data Matrix, Code 128) – no more struggling with region-specific codes. It works even for damaged or smudged barcodes (common in international shipping).

Right-to-Left Interface: For Arabic, Hebrew, and Persian users, the interface flips to right-to-left display – text, buttons, and menus are aligned correctly, making it easy to use.

Universal Payment Processing: Supports EMV chip cards, contactless payments (Apple Pay, Google Pay), and regional mobile payment apps (e.g., PromptPay in Thailand, Paytm in India, Mercado Pago in Brazil). The PSAM card slot adds an extra layer of security for regional payment systems.

Climate-Resistant Build: The body has an anti-humidity coating (prevents moisture damage) and the battery is tested to work in -10 ~50  – perfect for businesses in extreme climates. The rubber edges also protect against dust (common in desert regions).

International After-Sales Support: 24/7 multilingual support (English, Spanish, French, Mandarin) and a 2-year international warranty mean help is always available – even if you're using the device in a remote country. Replacement parts can be shipped to 190+ countries, minimizing downtime.

Packing list and package :
Sunmi V2 PRO * 1
Adaptor * 1
Warranty card and user manual * 1
USB cable * 1

1pc in one box , 15pcs in one carton.

## FAQ

Could you provide product samples?
Yes, we can provide some free samples, but you must pay for the express delivery.

What are your delivery terms?
We accept FOB, CFR, CIF, etc. You can choose the most convenient or the most cost-effective one.

How quickly can I get the product quotation?
We usually quote within 24 hours after receiving your inquiry. If you urgently need to obtain the price, please feel free to call us or give us your email so that we can give priority to your inquiry.

Could you print our logo on the product?
Yes. We can print your logo on the product. There are laser and silk-screen coloring methods.

How is the preparation time for shipment?
To be honest, it depends on the order quantity and the season when you place your order. As usual, the delivery time for sample orders is approximately 3 to 7 working days. The delivery time for bulk orders is approximately 8 to 15 working days.

What payment methods do we have?
We have many payment methods. We have different payment methods for different countries, (wire transfer, PayPal, Westerun Union...) Please contact our colleagues to learn about the detailed payment methods.
