RAM	2GB
SSD	16GB ROM
Speaker	1* 1.2W
SIM	2*Nano SIM
Scanner	Professional 1D/2D scan engine
Battery	7.7V/3500mAh
Receipt Printing Paper	width 80mm

Product Description

The SUNMI V2s PLUS Standard Version is a compact, affordable solution for small retail shops and lottery sales kiosks. Its space-saving design (237.2×100.91mm) fits on even the smallest counters, leaving room for more products (and more profits). It combines a basic 1D barcode scanner (for retail products/lottery tickets), an 80mm thermal printer (for receipts and lottery tickets), and a user-friendly interface (SUNMI OS) into one device. The 2GB RAM + 16GB ROM configuration handles daily retail tasks (scanning, payment processing) smoothly, and the long-lasting battery (16+ hours continuous use) lasts a full shift. It connects to wireless cash drawers via Bluetooth, turning it into a complete POS system, and the 5MP rear camera lets you take photos of new products for inventory. Whether you're running a convenience store, a lottery kiosk, or a small gift shop, this device simplifies checkout, saves counter space, and fits your budget.

Product Application Scenarios

Convenience Stores (7-Eleven, Local Shops): Cashiers use the 1D scanner to ring up snacks, drinks, and cigarettes – the device auto-calculates totals and applies promotions (e.g., “2 for \$5”). The 80mm printer prints receipts in 2 seconds, and Bluetooth connects to a wireless cash drawer (for storing cash). The compact design fits on the counter next to the register, leaving room for display racks of chips or candy. The 16+ hour battery means no need to plug it in during the shift, and the removable battery lets you swap it if it runs low.

Lottery Sales Kiosks: Lottery sellers scan customer-selected numbers (via 1D barcode on play slips) and print lottery tickets using the 80mm printer. The printer produces clear, smudge-proof tickets with barcodes (compatible with lottery systems like Mega Millions). The compact design of the device means the kiosk can fit in high-traffic areas (e.g., mall entrances) without taking up too much space. The 4G connectivity syncs ticket sales to the lottery's central system in real time, preventing duplicate tickets.

Small Gift Shops: Shop owners use the device to process customer payments – the 1D scanner reads product barcodes, and the printer prints receipts with the shop's logo (customizable via SUNMI App Store). The 5MP rear camera takes photos of new products (e.g., handmade jewelry) to upload to social media, and the dual-band Wi-Fi lets you check inventory levels via a retail app (e.g., Square). The lightweight design (535g) means you can carry it around the shop to help customers at different

aisles.

Newsstands & Bookstores: Cashiers scan magazine or book barcodes with the 1D scanner, and the 80mm printer prints receipts. The device's compact size fits on the narrow counter of a newsstand, and the 14-day standby mode means it doesn't need charging if the stand is closed on weekends. Bluetooth connects to a small cash drawer, and the SUNMI OS lets you track top-selling magazines (via sales reports) – helping you stock more of what customers want.

Product Advantages

Saves Counter Space: Compact design (237.2×100.91mm) takes up half the space of traditional POS terminals – critical for small shops where counter real estate equals profits. You can display more products (e.g., candy, lottery tickets) where a bulky POS would have been.

Affordable All-in-One Functionality: Combines scanner, printer, and POS into one device – saves \$300+ compared to buying separate tools (1D scanner: \$50, receipt printer: \$100, POS terminal: \$200). Perfect for small businesses with tight budgets.

Easy to Use: SUNMI OS has a simple, intuitive interface – no tech skills needed. Cashiers can learn to scan a barcode, print a receipt, and process a payment in 5 minutes. The orange buttons (power, volume) are easy to find in busy shops.

Flexible Connectivity: Bluetooth connects to wireless cash drawers and barcode scanners (if you need extra scanning power), and dual-band Wi-Fi/4G ensures sales data syncs to your retail app. This means you can run your shop from anywhere – check sales reports on your phone while at home.

Durable for Daily Use: 1.0m drop test certification means it can handle accidental knocks (e.g., a customer bumping the counter). The wide temperature range (-10~50) works in hot shops (no AC) or cold newsstands (winter months).

Product Features

Fast Receipt Printing: The 80mm thermal printer works at 80mm/s – prints a receipt in 2 seconds. It uses standard 80mm paper rolls (widely available and affordable), and the translucent cover lets you check paper levels without opening the device.

1D Barcode Scanning: The basic scanner reads 1D barcodes (UPC, EAN) quickly – perfect for retail products, lottery tickets, and magazines. It works even if barcodes are slightly smudged (common on snack packages), reducing manual entry.

Wireless Cash Drawer Integration: Bluetooth 4.2 connects to most wireless cash drawers – no wires needed. The device sends a signal to open the drawer when a cash payment is processed, streamlining checkout.

Customizable Receipts: SUNMI App Store has apps that let you add your shop's logo, return policy, and social media handles to receipts – turning receipts into marketing tools. You can also print promotions (e.g., "10% off next purchase") to encourage repeat business.

Long-Lasting Battery: Removable 7.7V/3500mAh battery lasts 16+ hours on a single charge – enough for a full retail shift (9 AM to 11 PM). The LED battery indicator lets you see charge levels at a glance, so you never run out of power unexpectedly.

Packing list and package :
Sunmi V2s Plus * 1
Adaptor * 1
Warranty card and user manual * 1
USB cable * 1

1pc in one box , 15pcs in one carton.

FAQ

Could you provide product samples?

Yes, we can provide some free samples, but you must pay for the express delivery.

What are your delivery terms?

We accept FOB, CFR, CIF, etc. You can choose the most convenient or the most cost-effective one.

How quickly can I get the product quotation?

We usually quote within 24 hours after receiving your inquiry. If you urgently need to obtain the price, please feel free to call us or give us your email so that we can give priority to your inquiry.

Could you print our logo on the product?

Yes. We can print your logo on the product. There are laser and silk-screen coloring methods.

How is the preparation time for shipment?

To be honest, it depends on the order quantity and the season when you place your order. As usual, the delivery time for sample orders is approximately 3 to 7 working days. The delivery time for bulk orders is approximately 8 to 15 working days.

What payment methods do we have?

We have many payment methods. We have different payment methods for different countries, (wire transfer, PayPal, Western Union...) Please contact our colleagues to learn about the detailed payment methods.
