

SUNMI P3 MIX Multi - Payment Built -in Printer Qualcomm QR Scan Fingerprint Android 13 System Pos Desktop

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Sunmi
- Certification: CE , FCC , RoHs , MSDS , EMV , Paypass , PCI
- Model Number: SUNMI P3 MIX
- Minimum Order Quantity: 10
- Price: to be negotiated
- Packaging Details: 1pc/box,10pcs /carton
- Delivery Time: 4 - 7 working days
- Payment Terms: T/T, L/C
- Supply Ability: 15000 pieces per month

Product Specification

- Features: EMV Chip And PIN, NFC Payments, Receipt Printer
- Memory: 4GB RAM+32GB ROM
- Display: 10.1"HD 1280 X 800 IPS
- Camera: Front: 2MP FF QR Payment: 0.3MP FF
- Card Reader: EMV, Magstripe, Contactless
- Model: T6721
- Operating System: Android 13
- Highlight: **SUNMI P3 MIX POS terminal,
Android 13 POS system,
built-in printer payment terminal**

Product Description

Product Description:

In the hospitality and retail industries, mobility is no longer a luxury – it's a necessity. Customers expect fast, convenient service that meets them where they are, whether that's at their table in a restaurant, in the middle of a retail store, or at a drive-thru. For businesses, this means ditching bulky, fixed POS systems in favor of portable solutions that don't compromise on functionality. The SUNMI P3 MIX is designed to meet this demand, offering a perfect blend of portability, power, and versatility for hospitality and retail businesses. This all-in-one enterprise tablet combines a lightweight, ergonomic design with a powerful processor, large display, and full-featured payment processing, making it ideal for on-the-go use. Whether it's tableside ordering in a fine-dining restaurant, mobile checkout in a department store, or drive-thru payment in a fast-food chain, the P3 MIX delivers. Powered by SUNMI OS 4.0 (based on Android 13), it integrates seamlessly with hospitality and retail software, enabling real-time order syncing, inventory management, and customer data tracking. With its durable build, enterprise-grade security, and range of accessories, the P3 MIX is the ultimate mobility solution for businesses looking to enhance customer experiences, improve operational efficiency, and stay ahead of the competition.

Features:

Ergonomic Portability for All-Day Use: Weighing just 670g and featuring an ergonomic design, the P3 MIX is comfortable to carry for extended periods – essential for hospitality and retail staff who are on their feet all day. The slim profile fits easily in hands or carrying cases, while the aluminum-magnesium alloy frame ensures it's durable enough to withstand daily use.

Large, Immersive Display: The 10.1-inch HD IPS display offers a wide viewing angle and accurate color reproduction, making it perfect for showcasing menus, product images, and order details. Customers can easily browse options on the large screen, while staff benefit from clear, easy-to-read interfaces for order entry and payment processing.

Mobile Payment Processing Anywhere: The P3 MIX supports all major payment methods, including contactless, Chip & PIN, magnetic stripe, QR code, and mobile payments. This means staff can process payments anywhere – at the table, on the sales floor, or at the drive-thru – eliminating the need for customers to wait in line. The PCI and EMV certifications ensure secure transactions, building trust with customers.

Fast, High-Quality Printing: The built-in thermal printer (58mm or 80mm) prints receipts, order tickets, and invoices at 70mm/s, ensuring fast service during peak hours. The printer is integrated into the device, so there's no need to carry a separate printer – perfect for mobile use.

Professional Barcode Scanning: The 2D professional scanner quickly and accurately reads 1D/2D barcodes, even if they're dirty, damaged, or low-quality. This is essential for retail inventory checks and fast checkout, as well as hospitality inventory management (e.g., scanning ingredients or beverage bottles).

Flexible Mounting and Accessories: The P3 MIX offers a range of accessories to enhance mobility and functionality. The shoulder strap allows for hands-free use, while the wall mount saves space in small areas. The rotatable cradle can be used to convert the device into a desktop POS, with connections for cash drawers, customer displays, and network accessories – making it versatile enough for both mobile and fixed use.

Seamless Connectivity: Stay connected with 4G, 2.4G/5G Wi-Fi, and Bluetooth, ensuring real-time syncing of orders, payments, and inventory data with backend systems. This is crucial for hospitality businesses that need to send orders to the kitchen instantly and retail businesses that require accurate, up-to-date inventory information.

Long-Lasting Battery: The removable 7.2V/2600mAh lithium battery provides all-day power for busy shifts, and the pogo pin charging option allows for easy recharging when using the cradle. The removable design means spare batteries can be swapped in for uninterrupted use during long days.

Technical Parameters:

Camera	Front: 2MP FF QR Payment: 0.3MP FF
model number	P3 MIX
brand name	Sunmi
Dimensions	10.1inch
Printer	58mm/ 80mm

Ports	1Type-C, 1Type-A, 1*Pogo pin (back, for charging)
Buttons	1Power on/off, 1Volume (+/-), 1*Scan button
Dimensions	246 * 231 * 73mm

Applications:

Fine-Dining Restaurants: Fine-dining restaurants prioritize personalized, attentive service. The P3 MIX allows servers to take orders tableside, with the large IPS display showing high-quality menu images and descriptions. Orders are sent directly to the kitchen, reducing errors and wait times. After the meal, servers can process payments at the table, offering multiple payment options and printing receipts instantly. The ergonomic design ensures servers can carry the device comfortably throughout their shifts, while the durable build withstands accidental bumps in busy dining rooms.

Department Stores: Department stores have large floor plans, making fixed POS systems inconvenient for customers. The P3 MIX enables mobile checkout – staff can meet customers wherever they are in the store, scan products with the 2D scanner, process payments, and send digital receipts. The inventory management feature allows staff to check stock levels and product availability on the spot, reducing customer disappointment. The rotatable cradle can be used at customer service desks for returns and exchanges, with a cash drawer and customer display for a full POS setup.

Fast-Food Chains (Drive-Thru): Drive-thru efficiency is critical for fast-food chains. The P3 MIX speeds up order taking and payment processing – staff can use the device to take orders, process payments (including contactless and mobile payments), and print receipts without customers leaving their cars. The fast thermal printer ensures quick service, while the 4G and Wi-Fi connectivity syncs orders with the kitchen in real time. The durable build withstands outdoor conditions, and the long-lasting battery ensures all-day use during peak hours.

Bars & Nightclubs: Bars and nightclubs are fast-paced environments where speed and mobility are key. The P3 MIX allows bartenders to take orders from customers at their tables or in the seating area, process payments instantly, and print receipts. The large display is easy to read even in low light, and the 2D scanner can be used to scan drink coupons or loyalty cards. The shoulder strap accessory allows bartenders to carry the device hands-free while serving drinks, and the support for contactless payments reduces the need for cash handling – improving security and speed.

Pop-Up Shops & Markets: Pop-up shops and market vendors need portable, versatile POS solutions. The P3 MIX is perfect for these temporary locations – it's lightweight and easy to transport, with no need for bulky equipment. Vendors can process payments using multiple methods, scan products with the 2D scanner, and print receipts. The 4G connectivity ensures they can accept payments even in areas without Wi-Fi, and the optional wall mount or cradle provides a stable setup on temporary tables. The device's durability withstands the hustle and bustle of markets, making it a reliable choice for mobile businesses.

Support and Services:

Our Payment pos product comes with comprehensive technical support and services to ensure that you have a smooth and hassle-free experience. Our team of experts is available to assist you in case of any issues or queries related to the product. The technical support and services we offer include:

[24/7 customer support via phone, email, and chat](#)

[On-site technical support](#)

[Regular software updates to ensure optimal performance](#)

[Training sessions for your team to fully utilize the product](#)

[Customization services to tailor the product to your specific needs](#)

Our goal is to provide you with the best possible experience with our Payment pos product, and we are committed to helping you every step of the way.

Packing and Shipping:

Product Packaging:

1 Payment POS device

1 power adapter

1 user manual

Shipping:

Shipping method: Standard shipping

Estimated delivery time: 5-7 business days

Shipping cost: to be checked
